FOREWORD

This County Integrated Development Plan (CIDP) 2018-2022 outlines the policies, programs and projects that will be accorded priority over the next five years. It builds on the achievements of devolution since the promulgation of the Constitution of Kenya 2010 and seeks to address the development needs of the people of Kitui County.

The CIDP II for Kitui County is carefully prepared with the focus of empowering the communities of the county. The plan gives a detailed overview of what the county needs are and what is to be done to address the needs. This overview will help keep the county government focused on implementing the specifics earlier identified as key to solving the needs of Kitui people. This focus will help ensure greater success of the county government's initiatives by pursuing completion/ accomplishment of each initiative. It will also afford the county unity of direction as it brings on board all stakeholders. Above all, this plan gives a clear guide on what my government wants to do and therefore offers clarity to every stakeholder in county development so that all align to it to deliver what the people of Kitui want. This CIDP therefore will be a basis for policy, planning and resource allocation in the county.

During the CIDP I period, the county saw an improvement in the road infrastructure. These helped open up the otherwise inaccessible parts of the county and enabled increased interactions including business transactions within the county. There was increased access to water and sanitation. New health facilities were also built thus reducing the burden to Kitui communities etc

To build on the above mentioned successes and in cognizance of the much yet to be done, the development approach we propose to adopt in the CIDP II embraces the principle of 'leave no one behind'. This integrated and inclusive approach provides the opportunity for all to join in shaping the socio-economic transformation of Kitui County. During this plan period, my government will pursue policies, programs and projects to enhance food security through support to agriculture increase in irrigation and value addition. Access to clean and sufficient water for domestic and commercial use will be accorded high priority too, to sustainably achieve this, we will devise measures to increase access to piped water, drilling of boreholes, sand dams and water wells. The County will also implement a Health Insurance Scheme to ensure that catastrophic out-of-pocket expenditures are significantly reduced to lessen the health burden of the vulnerable groups in the county. While the County will continue to provide free Early Childhood Education, pro-poor interventions will be scaled-up to ensure improved access to education and training.

The CIDP II has also prioritized wealth creation through a Value Chain Approach that will seek to create an enabling environment for agriculture-based value addition chains. In particular, the Ndengu Value Chain, Livestock and Poultry Value Chain, the Textile/Garment Value Chain, Mango and other fruits Value Chain, Honey value chain, Ballast crushing, milk processing, soap and detergent making, furniture making, charcoal and sand charcoal harvesting; and the pottery and ceramics value chains. This approach will ensure that employment opportunities are adequately generated. My Government is also going to work closely with other stakeholders to ensure that the natural resource wealth of the County is exploited efficiently while employing modern technologies that ensure sustainability. We stand for environmentally friendly development, as a result, we shall be pursuing various environmental adaptation and mitigation measures including promotion of drought resistant crops, clean energy, water harvesting, tree growing and conservation of water-catchment areas. These measures will be supported by reforms in public finance management and County public service to enhance efficiency in resource allocation and service delivery.

The Kitui CIDP II also prioritises community development as evidenced in the preparation process where Village Committees were encouraged to identify and prioritise projects that will be implemented in the next five years. I believe that increased participation by the people during planning, implementation and monitoring and evaluation of projects and programmes will empower citizens in exercising their democratic rights to realize social, political and economic development.

While the CIDP II mainstreams the development agenda outlined in the Five Pillars in my Government's Manifesto/County development agenda, it is aligned to the goals of the Kenya Vision 2030 and its Third Medium Term Plan (MTP), the "Big 4" development agenda of the National Government, and the aspiration of the Agenda 2030 for Sustainable Development Goals. The five pillars captured in the Kitui CIDP II are: Food and Water, Health care, Education and Youth Empowerment, Women Empowerment and Wealth Creation. Data from the Kenya Integrated Household Budget Survey 2015/16 confirms that indeed the priority areas are relevant and pertinent to the people of Kitui County.

Finally, it is important to note that the successful implementation of this CIDP requires the dedication and commitment of all key stakeholders. I am therefore confident that we shall all join hands and work as a team, in the socio-economic transformation of this great County.

H.E. Charity K. Ngilu
Governor Kitui County

ACKNOWLEDGEMENT

The preparation of the County Integrated Development Plan 2018–2022 took a lot of effort from many individuals, organizations and institutions which I wish to acknowledge. Special thanks to Her Excellency Mrs. Charity K. Ngilu, the Governor of Kitui County, and His Excellency Dr. Gideon W. Nzau, the Deputy Governor of Kitui County for their leadership and support in the preparation of the CIDP. Further, I wish to thank all the members of the County Executive Committee, and their respective departments for their invaluable ideas and inputs during the entire process of preparing this plan.

I also wish to acknowledge contributions made by members of the public, Non-Governmental Organizations (NGOs), Civil Society Organizations (CSOs), Development Partners and experts who participated and provided ideas and their expertise during the public participation forums, and submission of written comments and suggestions. Specifically, special thanks go to Catholic Dioceses of Kitui (CARITAS), The Centre for Human Rights and Civic Education (CHRCE) and The National Drought Management Authority (NDMA) for their financial support in some activities during public participation while preparing this county plan. Further, the below listed organizations propelled the CIDP preparation process by contributing invaluable information; Adventist Development Relief Services (ADRS), World Vision, Dorcas AID, National Council of Churches of Kenya (NCCCK), Kenya National Bureau of Statistics (KNBS), Food and Agricultural Organization (FAO), Netherlands Development Organization (SNV) and Mutonguni Village Conservation Team.

I wish to extend gratitude to the National Treasury and Planning for the support extended in the preparation of this plan. I would like to especially acknowledge the technical contributions made by Welime Mabuto and Rodgers Ochieng from the Monitoring and Evaluation Directorate and Samuel Nguluu, Daniel Odhiambo, Richard Munyithya and Isabella Kiplagat all from the Directorate of Economic Development Coordination. Their inputs further authenticated our plan.

Special thanks go to Bishop Mutemi, Sub-County, Ward and Village Administrators for their assistance in mobilizing the Kitui residents for public participation forums. I acknowledge with appreciation policy proposals from the County Budget and Economic Forum (CBEF) during the consultation process.

I appreciate the role played by Justus Makau, Chief Officer, Economic Planning in the finalization of this Plan and County Economists, Victor Mwangi, Paul Kimwele, Bonface Muli, Daniel Mbathi, Hanriettah Ndunge, Faith Muna, Geoffrey Gisaina and Nicholas Koome, led by Fidhelis Mwaniki, the Deputy Director, Economic Planning in coordinating the preparation of the Second Generation CIDP for Kitui County.

Lastly and equally important, I wish to acknowledge the contributions made by the Members of the County Assembly led by Hon. George M. Ndotto, the Honourable Speaker of the Kitui County Assembly who showed overwhelming leadership in the legislative process concerning the County plan.

Mary N. Nguli
County Executive Committee Member,
County Treasury

Executive Summary

The theme of the Kitui 2018-2022 County Integrated Development Plan (CIDP) is Transforming Kitui for Inclusive and Sustainable Development. This plan was prepared through a highly participatory and consultative process. The CIDP provides a platform to facilitate an integrated and coordinated approach to addressing the key development needs of the people of Kitui, namely, food security and water, affordable and quality health services, wealth creation, access to education and inclusivity. The Plan has six chapters, as outlined below.

Chapter one provides an overview of the County, particularly, resource endowments, main economic activities, the demographic trends and situation analysis of recent socio-economic performance. The major development needs and constraints are also highlighted.

Chapter two describes the linkages between the County Integrated Development Plan and other plans and strategies particularly, the Kenya Vision 2030, its third Medium Term Plan and the Sustainable Development Goals (SDGs). This Plan has mainstreamed the development agenda outlined in the Governor's Manifesto and accords priority to programmes and projects that support the goals of the Third Medium-Term Plan (MTP III 2018-2022) and Kenya Vision 2030. In this regard, the CIDP is aligned with the development agenda of the National Government which will enhance policy coherence. The Chapter also highlights how the strategic priorities in the CIDP align with sixteen Sustainable Development Goals.

Chapter three reviews the implementation of the First Generation CIDP by analyzing expenditure and revenue trends including key achievements and lessons learnt in the implementation of the previous CIDP. The analysis points to the need to enhance project implementation and resource mobilization capacity. Kitui county made some key achievements during the implementation of CIDP I which includes: Completion of stalled health facilities and construction of new facilities including the elevation of Ikutha health center to a level four (4) hospital through the expansion and equipping of the hospital, Addressing youth unemployment problem through the implementation of the Access to Government Procurement Opportunities (AGPO) and 100% matching grant to support youth in starting businesses, Investment in small honey industries, provision of open irrigation kits, provision of greenhouses to increase food production and farmers' income, and Creation of cooperatives to facilitate access to credit, Increased access to water through the provision of water tanks to public health centers, ECDE Centres and market centers, drilling of boreholes and construction of earth dams, Increased enrolment in ECDE centres from 65,000-88,106, Establishment of a rescue center for street children; Facilitated the issuance of title deeds; Installation of street lights in major towns; Construction of bridges and culverts, and markets and Mapping of existing tourism potential areas. The review recommended for induction and capacity building for both county executive and assembly staff on financial management, procurement, and government accounting procedures and financial. In addition, project prioritization should be done in the context of limited resources and enhance local resource projections. Each department should develop a strategic plan aligned with the CIDP. Also, the County should institutionalize a monitoring and evaluation system together with a performance management framework to support the implementation of the CIDP.

Chapter Four discuss the spatial development framework, key County development needs and priorities, strategies and programmes. The resource requirements are identified for each sector together with key performance indicators for the period 2018-2022. The Chapter highlights the flagship programs and projects geared towards achievement of the five pillars according to the governor's manifesto as outlined below.

Pillar I: Food and Water; Enhance agricultural productivity through mechanization –tractors/farm machinery & equipment's/ farm implements, Enhance agricultural production and food security: (Crop Development and Food Security), Promote irrigated agriculture development, Promote agricultural value chains i.e Mango, ndengu, dairy farming , livestock, poultry and purchase of transportation trucks, Support post-harvest management (Packaging, storage, and marketing access of products), Provision of farm inputs- Certified seeds, pesticides, packaging materials etc , To enhance accessibility and availability of clean water: (Geological Surveys & designs; Construction/desilting of earth dams; repairs, Drilling and Equipping of Boreholes; Construction/Extension of water pipelines; Construction of water treatment plants)

Pillar II: Healthcare; Universal Health Care (UHC), Equipping of health facilities including level 4 hospitals, Operationalization of amenity wards in Kitui County referral hospital and Mwingi Level IV hospital, upgrading Kitui referral hospital to level V. Operationalization of non-operational Health Facilities, strengthening the workforce in healthcare; (Recruitment of additional health care workers / staff), Strengthen Governance Structures of Hospital Management Boards and health facility management committees;), enhanced Service delivery through integrated data collection for health financing and other services, Improvement of referral systems, Establishment of level IV hospitals and Provision of adequate drugs and non-pharmaceuticals.

Pillar III: Women Empowerment; Capacity building for women- 100% pro-wealth creation & access to procurement opportunities for Kitui women- assist them set up businesses, Women socio-economic empowerment: Provision of credit- Revolving Fund, Value chains around garment industry and Formation of women co-operatives

Pillar IV: Youth and Education; Training Youths on Entrepreneurship, garment making, vocational skills and technical skills e.g electrical, plumbing, mechanical (Qualified artisans) etc, Capacity building for the Boda boda operators by equipping them with necessary skills, safety measures and formation of co-operatives, Support Car washing businesses, Attachment, internship and apprenticeship program (on-job training), Formation of groups (co-operatives) to drive business processes and assisting them acquire various equipment for value addition, Upscaling youth business skills; (upgrading business skills and start up kit for small scale businesses – Access to credit) and Establishment of centers of excellence in Youth Polytechnics; (modern technical workshops)

Pillar V: Wealth Creation; Development and promotion of value chains livestock (abbattoirs), honey, mangoes, poultry, leather, garment making , Ndengu revolution program, Revolving Fund/improved access to credit, Marketing & branding of Kitui products, Electrification of medium and small towns to support business growth and industrial parks, Establishment of business parks; eg cottage industries, leather (tannery), soap making, pottery & textile(garment industry), market access (Promotion of Agribusiness, Marketing and Value Addition) , Use of local materials- acquisition of ballast crushers, pottery kilns and charcoal burning kilns, Promotion and support of renewable and clean energy programmes e.g wind and solar

The implementation framework for the CIDP is outlined in chapter five, particularly; the role of key stakeholders such as the County Executive and County Assembly in implementing this CIDP. The Office of the Governor will provide overall leadership and policy guidance in the implementation of the CIDP. The County Assembly on the other hand, will play a critical role in enacting enabling legislations and providing oversight of public financial management to enhance accountability, participation and transparency. It is expected that the National Government and development partners will support institutional capacity development at the County. The Chapter also discusses the resource mobilization framework which includes revenue raising, asset management, financial management, debt management, capital financing and enhanced accountability. It is estimated that the overall successful implementation of this CIDP 2018 -2022 will cost Ksh. 140.5 billion as the total estimated cost of implementing all activities of the CIDP II. The projected funds from the equitable share, local collection and conditional allocations are estimated to be Ksh. 69.2 billion for the period 2018/2019-2022/23. This implies that there is a financing gap of Ksh. 71.3 billion.

The monitoring and evaluation framework is discussed in chapter six. During the plan period, the County will continue to institutionalize a robust M&E framework that is linked to the County Performance System. Regular reporting is an integral part of the M&E system. The chapter also contains a Results Matrix that summarizes the programme outcome indicators and targets, to facilitate assessment of progress in the implementation of the CIDP. A unique feature of the Kitui CIDP is that it contains an Annex of project proposals at the Ward level that were developed through a highly participatory process that evaluated various proposals by Village representatives during public forums that were held across the County

CHAPTER ONE: COUNTY GENERAL INFORMATION

This chapter gives a brief overview of Kitui County in terms of location, size, physiographic and natural conditions, demographic profiles and trends, and the administrative and political units. The Chapter also provides an analysis of the social-economic situation infrastructure development, social economic development as well as the key economic activities in the County.

1.0 County Overview

Kitui County is one of the three Kenyan Counties inhabited by the majority Akamba community. The akamba people were historically long distance traders. The trade inclination has made the wakambas highly receptive and hospitable to visitors. With its headquarters at Kitui town, The County is resource rich with commercially viable coal reserves in Mui Basin. Other mineral resource includes limestone, iron ore and sand. Forty-six (46) percent of the Tsavo East National Park is in Kitui County and has a great heritage with great untapped tourism potential. Proximity to Nairobi and the Standard Gauge Railway offers great opportunities for economic transformation. Permanent rivers, namely, Tana and Athi flow through the County. The County had an estimated population of about 1.1 million persons in 2016.

Despite the great potential, Kitui County is among the Arid and Semi-Arid (ASAL) counties characterized by relatively high levels of poverty. The level of absolute poverty is estimated at 47.5 percent compared to the national average of 36.1 percent in 2016. About 522,000 persons or 3.2 percent of the Kenyan poor live in the County. Food poverty is estimated at 39.4 percent compared to the national average of 32 percent. About fifty percent of the population does not have access to improved water sources and 57.6 percent of households spent thirty minutes or more to fetch drinking water. Kitui County is a member of South Eastern Kenya Economic Bloc (SEKEB). It also forms part of the proposed Vision 2030 Metropolitan region of Kitui-Mwingi-Meru.

1.1. Position and Size

Kitui County is about 160 kilometres from Nairobi City on the eastern part of Kenya. The county is the sixth largest County in Kenya by land area covering an area of approximately 30,496.4 KM². It shares its borders with seven other counties, namely, Machakos and Makueni counties to the west, Tana River County to the east and south-east, Taita Taveta County to the south, Embu to the north-west, and Tharaka-Nithi and Meru counties to the north. It is located between latitudes 0°10 South and 3°0 South and longitudes 37°50 East and 39°0 East. Figure 1 shows the position of the County.

2

1.2. Physiographic and Natural Conditions

1.2.1. Physical and Topographic features

The general landscape is flat and gently rolls down towards the east and northeast where altitudes are as low as 400 meters. The altitude of the Kitui County ranges between 400m and 1800m above sea level. The Yatta Plateau is in the western part of the County and stretches from the north to the south of the County between Rivers Athi and Tiva.

1.2.2. Ecological Conditions

The County has seven agro-ecological zones. These are: Upper-Midland 3-4; Upper-Midland 4; Lower-Midland 3; Lower-Midland 4; Lower-Midland 5; Inner Lowland 5; and Inner Lowland 6. The actual and potential agricultural development activities are as summarized in Table 1.

1.2.3. Climatic Conditions

Most parts of the County have an arid and semi-arid climate with rainfall distribution that is erratic and unreliable. However, the highland areas namely, Migwani, Mumoni, Kitui Central, Mui and Mutitu Hills exhibit a sub – humid climate. The lowest annual average temperature is 14⁰C and the highest annual average temperature is 32⁰C.

1.3. Administrative and Political Units

1.3.1. Administrative Subdivision (sub-counties, wards, villages)

The County is divided into eight (8) sub-counties namely; Kitui Central, Kitui West, Kitui East, Kitui South, Kitui Rural, Mwingi North, Mwingi Central and Mwingi West. It is further subdivided into forty (40) wards. There are 247 County villages established through the Kitui County Villages Act, 2015.

The sub-counties are administrated by the Sub-County Administrators and the Wards by the Ward Administrators. The Village is the lowest level of the County Administrative Units. A Village Administrator is responsible for overall co-ordination and management of County affairs at the village.

Mwingi Central, Kitui East and Kitui South sub counties / constituencies have the highest number of County assembly wards (six), while Mwingi West, Mwingi North, Kitui West and Kitui Rural have the lowest number (four). The number of Villages range from 23 in Kitui West to 41 in Kitui South (Table 2).

The county also has national Government representation headed by the county commissioner who is the head of National governments administration wing within the county. The county commissioner is represented in the 17 Kitui County sub counties (formerly districts) by Deputy County Commissioners (DCCs), Assistant County Commissioners (ACCs), chiefs, assistant chiefs and head men at division, location, sub location and villages respectively.

1.4. Political units (Constituencies and Wards)

The County had 474,512 registered voters as of August 2017 as summarized in Table 3.

1.5. Demographic Features

1.5.1. Population size and composition

The County's population was 1,012,236 in 2009, according to the population and household census report of 2009. Kitui County population is estimated at 1,123,401 and is projected to reach 1,176,650 in 2022 (Table 4).

Table 5 shows population of the two-key urban centres in Kitui County. Using these urban centres, the level of urbanization is estimated at 14.2 percent in 2018 and is expected to rise to 15.2 percent in 2022. According to the KIHBS 2015/16, about 35.7 percent of Kenyans live in urban areas. The rapid rate of urbanization has clear implications for the need for urban planning.

1.5.2. Population density and distribution

Population density in Kitui was 33 persons per Km² in 2009 compared to a national average of 66 persons per Km². The population density is estimated at 37 persons per Km² and is projected to increase to 39 persons per Km². Kitui Central has the highest density (Table 6).

1.5.3. Population projection for special age groups

Table 7 presents population projections for special groups, namely, Under-5: Pre-school going age, 6-13, Primary school going age; 14-17, Secondary school going age, 15-35, Youth Population, 15-49; Female reproductive age, 15-64, Labor force; 65+, and the Aged population.

Under 5 years: This age-group comprises the pre-primary age group and below. This age-group had 161,502 children in 2009. The age cohort population is projected at 177,620 in 2018 is expected to increase further to 181,415 in 2020 or 15.8 percent of the County population. This trend has implications for public policy especially with regards to antenatal care, immunization, child nutrition and care and special policy attention towards Early Childhood Development (ECD) education.

Primary School Age (6 -13 years): This age-group is projected population at 25.6 percent of the County population in 2018. This has important implications for education sector budget especially infrastructure, provision of learning and teaching materials and personnel.

Secondary School Age (14 -17 years): The population in this cohort is projected to be 118,464 in 2018, or 10.5 per cent of the County population. The critical public policy concerns include access and quality of secondary as well as adolescent behavioral problems such as substance abuse. To ensure smooth transition, policy attention needs to be directed towards tertiary and university education. A robust economy is also essential to absorb some of the youth at this early age.

Labor Force (15 - 64 years): This comprises the economically active group. According to the 2009 census the County had a total labour force of 487,648 and is projected at 577,700 persons in 2018. This accounts for 51 per cent of the County population. Within this group, there are those that are employed, unemployed, inactive and those still under-going training especially within the age group 15-24 years. The key policy issues include creating an enabling environment for robust economic growth, skill acquisition and training and healthcare.

Aged Population (65+): This population aged 65 and above increased from 53,313 persons in 2009 to 70,582 in 2016. This population is projected to increase to 89, 579 in 2022. The needs

for this group include quality and accessible healthcare, social protection programs as well as a robust pension scheme.

1.5.4. Population of persons with disabilities

According to the KIHBS 2015/16, at the national level, the proportion of persons with disability is 2.8 percent. However, rural areas have a higher proportion of 3.3 percent compared to 2.0 percent for urban areas. Kitui County had a proportion 4.6 percent of persons with disability. Visual disability was highest at 2.4 percent. In Kitui County 62.3 percent of persons with disability reported difficulty in engaging in economic activity. This calls for disability mainstreaming as well as encouraging PWDs to register so that they can benefit from Government support.

1.5.5. Demographic Dividend

The demographic trends in Table 8 show the demographic dividend potential for Kitui County. The labor force as a percentage of County population is projected to increase from 48 percent in 2009 to 53 percent by 2022. At the same time total and child dependency ratios are expected to

decline from 108 and 97 in 2009 to 90 and 75 in 2022. However, aged dependency ratio is projected to increase from 11 to 17 over the same period. These trends point to the need for Kitui County to undertake specific strategic investments in health and wellbeing; education and skills development; employment and entrepreneurship development, good governance and youth empowerment, as well as pension reforms.

1.6. Human Development Approach

The Human Development Approach provides alternative measures of prosperity compared to the conventional approaches that focus GDP and Per capita income. It advocates for broader measures of well-being. The Human Development Index (HDI) integrates three dimensions of human development, namely, health, education, and income. The other composite measures of human development are Inequality-adjusted HDI (IHDI) that adjusts HDI for levels of inequality, the Gender Development Index (GDI) that compares female and male HDI performance and the Gender Inequality Index (GII) highlighting women's empowerment. There is also a Multidimensional Poverty Index (MPI) that integrates non-income dimensions of poverty.

Kenya is a medium human development country with HDI index of 0.555, ranked 146 out of 188 countries in 2015. However, Kenya performed better than her neighbors Uganda (position 163), Tanzania (151), and Ethiopia (174). After recording strong performance between 2000 and 2010, Kenya's HDI has experienced only modest growth since 2010, from 0.53 to 0.555 in 2015 (Figure 4). At the County level, Nairobi County had the highest HDI of 0.641 above the national average. Kitui County's HDI was estimated at 0.481 being below the national average in 2012. Effective development at the County level provides an opportunity to address the disparities that are reflected in the HDI.

1.7. Infrastructure Development

1.7.1. Roads and Rail Network

The County has one Class A road passing through the County, the A3 Thika-Garissa road. The Kibwezi-Kitui-Mwingi Road is being upgraded to be completed by 2020. There are other roads proposed in the Road Sub-Sector Investment Programme (RISP) 2010-2024 including: D478-Kola to A3-Nguni; B6-Kitui to A3-Ngooni; D507-Nuu to A3-Nguni; D507-Voo to B7-Ikutha; B7-Chuluni to D507-Mwitika; and E731-Miambani to D509-Mikuyuni. The County has Class E earth road network covering about 1,172.20 Kms. Upgrading of major roads to all-weather status and opening more feeder roads in the County will enhance connectivity and open the region for businesses and economic opportunities.

There are three airstrips in the County, namely, Ithookwe, Tseikuru and Mutomo airstrips. Refurbishment and routine maintenance will enhance connectivity. The County can also benefit significantly from T-Junction of the SGR at Kibwezi town via Mutomo and onwards to Mui Basin, which has commercially viable coal reserves.

1.7.2. Information, Communication Technology

The County Government recognizes the potential of ICT as an enabler of social economic development through delivery of public services and governance. The County is served by mobile telephone service providers namely, Safaricom, Airtel, and Telecom but the quality of coverage varies with the location. The County is served by 12 post offices run by the Postal Corporation of Kenya (PCK) which oversees mail and parcel delivery as well as offering data communication services. Kitui County has fibre optic connection, but it is yet to be extended to serve all key departments in the County.

1.7.3. Energy access

The main sources of energy for lighting are paraffin lantern, paraffin tin lamp, electricity connection from mains, solar energy and battery lamp (Table 10). About 33.4 percent of households use paraffin lanterns compared to a national average of about 15.7 percent. Electricity connections remain below the national average.

The main source of cooking fuel is firewood with 79.5 percent of the households using firewood compared to the national average of 54.6 percent. The use of Liquefied Petroleum Gas (LPG), Kerosene and charcoal for cooking is low in the County compared to the national average (Table 11). At the County, nationally, 76.4 percent of the households use traditional stone fire as a primary cooking appliance, compared to a national average of 46.4 per cent.

1.7.4. Housing: Types

The main types of houses are classified in terms of the different materials used in construction. Roofing materials in the County are mainly Corrugated Iron sheets roofs at 94.5 percent. A large percentage of households use earth/sand, and cement as floor material at 58.6 percent and 40.4 percent, respectively.

Walling of houses also vary with 33 percent having cement finish, 25.8 percent with bricks, and 23.5 percent with bamboo with mud/cow-dung.

1.8. Land and Land Use

1.8.1. Land ownership categories/ classification

In Kitui County, like in the rest of Kenya, there are three categories of Land. According to The Constitution of Kenya, Article 61 (2) “Land in Kenya is classified as public, community or private”. The Constitution, further defines public land as: (a) land which at the effective date was unalienated government land as defined by an Act of Parliament in force at the effective date; (b) land lawfully held, used or occupied by any State organ, except any such land that is occupied by the State organ as lessee under a private lease; (c) land transferred to the State by way of sale, reversion or surrender; (d) land in respect of which no individual or community ownership can be established by any legal process; (e) land in respect of which no heir can be identified by any legal process, among others. Further, the Constitution in Article 62, states that “Public land shall vest in and be held by a County government in trust for the people resident in the County”. In

this regard, it is not clear how much land in Kitui County is Public Land. To this end, there is a need to find out the extent of public land in Kitui County.

The second category of land is community land. According to Article 63 of The Constitution, “Community land shall vest in and be held by communities identified on the basis of ethnicity, culture or similar community of interest”. To some extent, community land includes what was formally known as Trust Lands and Group Ranches. There is also a need to establish how much community land is within Kitui County. In addition, areas of community land that are occupied by families, should be adjudicated and Title Deeds issued to the occupants of the land.

The final category is private land. According to Article 64 of the Constitution, “private land consists of: (a) registered land held by any person under any freehold tenure; (b) land held by any person under leasehold tenure; and (c) any other land declared private land under an Act of Parliament. Private land is considered to have secure land tenure and can act as a major form of wealth creation in the County. In this regard, people who have secure rights to land can invest in it because they are not afraid of losing their investment. The formal titles to land can also be used to secure credit from financial institutions, after which the money can be reinvested in the land or in another income generating activity.

1.8.2. Mean holding size

The County has a total area of 30,496.4 km² of which; 6,301.8 km² of the County land consists of the Tsavo East National Park and is not available for agriculture, 14,137.2 km² is arable agricultural land and 6,364.4 km² non-arable land. Over 85% of the County’s population lives in rural areas. The average population density is 44 persons/ KM² which is sparse. The average size of land holding in the County is 0.12 KM² per person (12 ha per person).

1.8.3. Percentage of land with title deeds

Approximately over 46% of the County land falls in the arable category with 83% of the inhabitants lacking title deeds reason being that most of the land has not been adjudicated. Only about 25% of land owners in the County have title deeds. The process of land adjudication and registration has slightly improved and land owners are constrained with regards to securing investment loans from banks and Micro Finance Institutions (MFIs). The County Ministry of Lands, Infrastructure and Urban Development has tried to hasten the process of land adjudication so as to fast track the issuance of title deeds to land owners in the County

1.8.4. Incidence of landlessness

Introduction of private land ownership and population growth are known to increase landlessness in an area. In the past, people lived in villages and shared access to land. When land is individualized, the registered land owner has the right to block other people, including family members from using the land. This can cause landlessness. In thesis published by Ndulu (2013), which has the title “Settlements, Evictions and Their Effects: The Case of Residents Of Kwa Vonza in Kitui County, Kenya” there is evidence of landlessness in Kitui County. However, the County government needs to carry out a survey and establish the exact number of landless people and possible provide a settlement scheme for them.

1.8.5. Settlement Patterns

The settlement patterns are influenced by agricultural potential of an area and proximity to urban areas. In Kitui County people tend to settle at the foot of hills where agriculture is possible. Usually soil is eroded from the top of the hills and accumulated at the bottom. In this regard, the foothills have deeper soil that is suitable for growing crops. Urban and peri-urban areas also have high densities because of access to social amenities. Kitui Central Sub County is the most densely populated, followed by areas around Mwingi Town. Kitui East Sub County is the least densely populated because it has drier climate.

1.8.6. EMPLOYMENT

1.8.6.1 Wage earners

The county has approximately 18,228 wage earners most of whom are from the public sector.

1.8.6.2 Self Employed

The approximate number of self employed people in Kitui county is around 388,431 of which the largest proportion do farming

1.6.8.3 Labour Force

The total labour force available in kitui county 514,133 of which their age range between 15 – 64 years.

1.9 Irrigation infrastructure and schemes

1.9.1 Irrigation potential

Kitui County topography is suitable for irrigation production system and the irrigation potential in the County is estimated to be 11,095 hectares of which a paltry 1,850 hectares is utilized. The potential for exploitable irrigation can be expanded to 500,000 hectares through development of the Tana and Athi River basins. The whole County is land mass lies within the Tana River drainage basin except a narrow strip along the south and southwest border draining into the Athi River. These two rivers form the northern, western and southern boundaries of the County. The Tana River is Kenya's largest and drains the eastern flank of the Aberdares and the southern slopes of Mount Kenya into the Indian Ocean. The length of this river within Kitui County is 405 Km while that of Athi River is 325 Km. There are numerous seasonal rivers draining into both Athi and Tana rivers. The most prominent ones with potential for wells development for irrigation are; Thunguthu, Katse and Nziitu in Mwingi North Sub-County; Tyaa in Mwingi Central; Ikoo, Nzeeu and Thua in Kitui East Sub-County and Kitui Central sub-counties; Kalundu in Kitui Central and Kitui Rural, Tiva in Kitui Central, Kitui Rural and Kitui South sub-counties; Mwiiwe and Wingoo in Kitui East, Kitui Rural and Kitui South, and Kaayo, Kauwi and Mutendea in Kitui West sub-County. Sand dams, water pans and earth dams are additional sources of water for irrigated agriculture.

1.9.2 Irrigation schemes (small/ large scale)

There are 5 irrigation schemes in Yatta/Kwavonza, Tseikuru, Zombe/Mwitika, Kitui Rural and Kyangwithya West wards, and 31 irrigation clusters. The irrigation schemes are financed by the National government, while the clusters are mainly financed by the County government. Two clusters are financed by NGOs. Irrigation clusters cover a total acreage of 101.5 acres (40.6

hectares). Most of irrigation schemes grow assorted vegetables and green maize; one scheme in Tseikuru ward in Mwingi North subCounty grows assorted vegetables and cotton whereas the schemes in Tseikuru Kyuso, and Mumoni wards grow assorted vegetables and water melons. These irrigation schemes if well-managed, would ensure food security for the region as well as allow for successful cultivation of cash crops that can be exported to markets across Kenya as well as global markets. Experience from other Countries and Counties shows irrigation to be a major driver of agricultural productivity, therefore the County government should strongly embrace and expand this venture as a matter of priority.

1.10 Crop, Livestock, Fish Production and Value addition

1.10.1 Main crops produced

The economy of the County is dependent on agriculture, which contributes to rural employment, food production and rural incomes. The level of food self-sufficiency in the County is 51%, however approximately 10 percent of the entire population is absolutely food insecure. The sector plays a major role by contributing about 87.3% of income earned by the rural population.

The main food crops grown in the County include cereals such as maize, sorghum, and millets; pulses such as green grams (Ndengu), cowpeas and pigeon peas; root crops such as cassava, sweet potatoes and arrow roots; industrial crops such as cotton, sisal and sunflower, and horticultural crops represented mainly by fruits such as mangoes, pawpaw, and water melons as well as vegetables such as tomatoes, kales, onions and bullet chilies. The total annual average crop production is 80,680MT for cereals valued at Kshs. 4.24 billion, 771MT for industrial crops valued at Kshs. 29.04 million and 36,950MT for horticultural crops valued at Kshs. 990 million. County crops are grown as sources of food and income and production is mainly dependent on rain. Rainfall in the County is not only inadequate but erratic thus necessitating the use of irrigation to augment food production.

1.10.2 Acreage under food and cash crops

Kitui has the potential to be a major food producing County in Kenya if appropriate agricultural interventions coupled with irrigation-based crop production are adopted. Currently, the average acreage (hectares) under food production is 192,325 compared to a potential of 400,000 for cereal crops; 298,277 compared to a potential of 380,000 for pulses; 350 compared to a potential of 2,000 for cassava; 907 compared to a potential of 170,000 for industrial crops (sisal, cotton and sunflower); 2765 compared to a potential of 16,500 for fruits, and 1170 compared to a potential of 84,500 for vegetables, respectively.

1.10.3 Average farm sizes

The types of farms in the County are mainly smallholder which integrates crops and livestock production. The average small-scale farm size in the County is estimated at 4.38 hectares and 50 hectares for large scale farms (ASDSP HH Baseline Survey, Vol. 1, 2014). The small-scale farms are common in densely populated areas around Kitui and Mwingi towns, areas of Migwani, Matinyani, Kyangwithya East, parts of Kyangwithya west, Nzambani, upper parts of Mulango and Mutonguni. A few large-scale farms especially of sorghum and green grams are found in Katutu, Kanyonyo, Kwa Vonza, Kanyangi, Mutomo, Ikutha and Kanziku. Other large-scale farms under free range livestock production system are found in Kyuso, Sosoma-Engamba, Tseikuru, Muumoni, Mui, Kanyonyo, Endau, Malalani and Mutha areas.

1.10.4 Main storage facilities

There are four National Cereals and Produce Board stores in Kitui County located at Kyuso, Mutitu, Kitui, and Mwingi towns. In addition, 38 aggregation centers spread across the County have been identified but are not well equipped for storage at the moment. The total storage capacity for the County is 500,000, 90-kg bags. Crop produce losses due to post-harvest handling and management and inadequate availability of storage facilities and structures at household level in the County is high.

1.10.5 Agricultural extension, training, research and information services

There is one Agricultural Training Centre (ATC) and one Agricultural Mechanization Station (AMS) in Kitui County. The two institutions are located at County headquarters in Kitui town. The ATC hosts demonstration plots while the AMS provides agricultural mechanization services through which they generate revenue. There is therefore need to open up branches of ATC in every sub-county to enable many farmers to access modern agricultural technology transfer with ease.

1.10.6 Main livestock breeds and facilities

The main livestock types kept in the County are cattle (beef and dairy), goats (meat and dairy), sheep and poultry (indigenous and exotic). Farmers have also ventured into apiculture. Livestock cushions farmers against adverse condition especially in times of drought. The sector largely contributes to income generation and food security in main livestock zones. In LM4, LM5, IL5 and IL6 it contributes approximately 40-50% of total household incomes while in UM3 and UM4 it contributes 20-30% of household incomes. The County annual average production levels for various livestock enterprise products are as follows; 3,077 tonnes of beef, 1466.6 tonnes of goat meat (Chevon) and 70 million eggs, 4.2 million liters of milk and 960 tonnes of honey against the estimated potential annual local demand of 32,120 tonnes of meat, 100.4 million liters of milk and 171.6 million eggs. Rangeland and pastures occupy about 1,048,728 hectares, which is about 80% of the County. The livestock carrying capacity is approximately 4.4 hectares per Livestock unit (LU). The Zebu constitutes 97% of breed kept while Boran and Sahiwal account for 3%. Over 55% of beef cattle are found in AEZ IL6 and 40% in UM 4 and IL5. The balance of 5% is found in UM3 and UM4. The preferred dairy breeds are Ayrshire, Friesian, Guernsey and Jersey and their crosses in that order. The main goat meat breeds are the Small East African, Gala and their crosses, whereas the main dairy goat breed is the Toggenburg (95%) and a few German Alpine (5%). The County annual hides production is estimated at 11,709Kgs valued Ksh. 1,813,680 while for goats, sheep and calf production is 239,835 pieces with an estimated value of Kes. 21,850,380. There are 71 slaughter slabs across the county though

majority slaughter goats. Cattle are slaughtered in the following areas, Kitui town, Mwingi town, Mutomo and Kabati markets. There are no industries in the County to process hides and skins into leather and its products.

Poultry includes domestic fowl, ducks, quails, turkeys, Guinea fowl, and geese. The most common poultry kept is indigenous chicken which is integrated in farming by over 90% households in the County. Farmers in the suburbs of major urban centers rear exotic breeds of poultry for egg and meat. Table 14 below shows livestock population in the county

1.10.7 Ranching (number, ownerships and activities)

The County has five cooperative ranches namely; B2 Yatta Ranch 53,000 acres, Nziu Ranch 76,000 acres, Sosoma Ranch 150,000 acres, SEKU and GASP ranches. The Nziu and Sosoma ranches are no longer operational. SEKU and GASP are being run by the South Eastern Kenya

University and the Catholic Diocese of Kitui respectively. B2 Yatta is owned by a Co-operative Society thus is classified as a group ranch, while Nziu and Sosoma are institutional ranches. Ranching is a very important production system for beef enterprise development and breed improvement. The annual income accruing from the three ranches in the County is estimated at Kes 916 million. However, the ranching production system faces a number of challenges. Namely

1.10.8 Apiculture (Bee-keeping)

Beekeeping has been practiced in Kitui County since time immemorial. It is viable and sustainable form of farming because of the amount of land considered as rangeland standing at over 70% and rainfall that support adequate vegetation necessary for bee foliage. Honey is produced mainly from traditional log hives by individual farmers locally referred to as 'Ikuli'. Most beekeeping activities are concentrated in Mwingi North, West and Central. Notable production is also seen in Kitui Rural, East and South. The bulk of beekeeping and honey production equipment are log hives which account for 95% of honey produced locally. Modern hives are few and account for a paltry 5% of honey production. There are 120,000 traditional hives and 10,387 modern hives in the County. The bulk of the honey estimated at 960 tonnes per annum valued at Ksh 290 Million is harvested from traditional hives. The modern hives produce an estimated 94 tons of honey with a value of Ksh. 28 million according to 2013 to 2015 average production figures. Honey from Kitui is still held in high regard. Small scale value addition is being undertaken by Mwingi Honey Cooperative. The County government is also promoting production and processing of honey through establishment of 16 honey processing units. Beekeeping is an enterprise with a lot of potential for improvement for honey production and income generation. The enterprise can be an important base for sustainable development of cottage industries in the County.

1.11 Mineral Resources

The minerals which have been established to be present in Kitui include coal, iron, sand and limestone. The commercial quantities and value have not been determined. In the CIDPII period, plans will be made to exploit the coal for local and export market using technology that is environmentally friendly. The County will collaborate with the National Government to carry out an exercise of mapping out the minerals and their commercial value. While money will be spent on this exercise the County stands to benefit more than tenfold from license fees from prospectus or mining companies that will show an interest in the business and the data.

1.12 Tourism and Wildlife

1.12.1 Main tourist attractions and activities

The County's tourist attractions are categorised as: National parks, game reserves and other tourist attraction centres such as Nzambani rocks.

Kitui County had 200 shopping centres in 2014. The number of registered traders has more than doubled within a period of three years from 5,532 in 2014 to 13,060 in 2017. Similarly, the number of registered wholesale traders stood at 1,530 in 2017 up from 142 in 2014. The number of registered jua kali artisans increased from 75 in 2014 to 420 in 2017. This is mainly attributed to improved measures by the County Government to enhance the registration of businesses and partly due to increase in the number of new businesses operating in the County. During the period, a total of 7 modern markets, 104 market sheds, 84 boda boda sheds and 26 public toilets were built. About 10 per cent of the market sheds are not in use because they have not been officially commissioned. All the modern markets are already in use. Most of these markets targeted fruit and vegetable traders. Therefore, markets for traders dealing with non-food items need to be considered too in the next five years. In 2017 the number of jua kali sheds was 1,503. There are plans to build more jua kali and boda boda sheds and also modern markets in the next five years so as to improve on the revenue collection and facilitate trade by creating a conducive environment for the traders across the County. The traders will also be able to lock their goods safely instead of carrying the goods to their homes in the morning and evening. There is also a proposal to have the markets installed with solar panels which is a cheap source of lighting the markets and can also be used in the cottage industries.

The Micro, Small and Medium Enterprises (MSMEs) are considered as sources of economic growth by creating employment, enhancing competition, fostering innovation reducing poverty which leads to social transformation. The role of MSME sector has been identified and prioritized as a key growth driver for achievement of the country's economic development blue print popularly known as the Kenya's Vision 2030 - the development blueprint which seeks to transform Kenya into an industrialized middle-income country, providing high quality life to all its citizens by the year 2030. Accordingly, the Vision 2030 emphasizes the need to deal with the informal economy through measures aimed at raising productivity, generation of jobs, owner's incomes and public revenues. It also recognizes the need for capacity building and appropriate financial services for MSMEs.

A number of MSMEs are formal, while majority fall within the informal sector of the economy. The MSMEs act as major job providers and they produce a significant share of total value added. They also provide a large segment of the poor and middle-income populations with affordable goods and services. The MSMEs cover almost all the sectors of the economy operating seasonally or all year round and are located in markets, streets, households or mobile.

MSMEs are defined according to employment size. According to the official Kenya definition, they are enterprises having between 1 and 99 employees (GOK, 2005). Micro-enterprises have less than 10 employees while small enterprises have 10-49 employees. The medium sized enterprises have between 50 and 99 employees.

According to the Micro, Small and Medium Enterprises (MSMEs) survey conducted in 2016 by the Kenya National Bureau of Statistics (KNBS), Kitui County was reported to have a total of 16,700 enterprises licensed by the County Government out of which 97.5 are micro and 2.5 per cent translating to about 418 enterprises. There is no medium enterprise in the County.

The numbers of unlicensed enterprises were notably high at 71,500. Most of these businesses were identified from the households. This is an indication that most enterprises operating in the County are not licensed (81 per cent) and only 19 per cent are licensed. This shows that there is a good chance for the County to increase its revenue from businesses by increasing the number of licensed businesses. This can be attained by creating a favorable environment for people to do business by setting up market sheds and modern markets across the County that are accessible. By so doing, people who operate their businesses along the street, households and those who move with their goods will have a place to do their businesses.

1.14 The Blue Economy (including Fisheries)

Fish farming was introduced in the County through the economic stimulus programme (2009-2013). In the programme each constituency was earmarked to receive 200 fish ponds. Though faced with many challenges like water availability and lack of equipment the sector is growing with subsequent support from the County government. The two common fish species in the ponds are Nile tilapia and Catfish. There are diverse species in the dams, but the most prominent ones are Cat fish, Carps, Tilapia and Others (Labeo, Eels, Mormyrus and Barbus). The main source of inland capture fishery is the Kiambere Dam along the Tana River in Mwingi North sub-County. The total fish production in the County is 57.71MT valued at 22, 366,000. The main markets for the products from the dam include Mwingi, Kitui, Embu, Nairobi, and Kabati among others.

1.15 Forestry, Agro Forestry and Value addition

Introduction

Table 25 summarizes the current state of forest cover and the commercial value of the business that emanates from the forests.

Forest cover

The table below gives data on the forest cover in percentage terms and the cover in hectares of gazetted and non gazetted forests and their projections. The gazetted forest cover is 16 in no and covers 37,750 hectares as at 2014. We don't have any data on what it is currently. The forest cover has increased from 3.5% to 7% and Kitui was voted the most improved County in forest cover recently. This is projected to increase to 10% and the current CIDP.

Gazettement is to preserve the forests biodiversity, environmental nature, cultural, scientific nature, or other special significant and natural form. Such forests in Kitui have natural species that produce fruits such as Turmeric tamarind and others. Research is needed in Kitui to determine the medicinal or cosmetic value of the vegetation and determine if they can be commercially exploited. This can be done in conjunction with SEKU University. There's no data on the volume and value of charcoal trade although it has been significant. This baseline needs to be established as it will form the basis for measuring the outcome of the programme of modernizing the charcoal economic activity.

1.16 Financial Services

The county consists of 8 Commercial Banks, 16 microfinance institutions and 6 insurance companies as the key financial institutions. In addition there are 205 cooperative societies of which 146 are operational with total registered members of 60,321.

1.17 Enviroment and Climate Change

1.18 Water and Sanitation

Kitui County current water supply and demand using an average consumption of 50 liters per person in urban and 25 liters per person in rural areas stands at 32,176 cubic meters and 12,586 cubic meters respectively. The shortage in urban areas is even worse than in rural with access to piped water standing at 36.1 % urban and 41.1 % rural. Water management in Kitui is under KITWASCO which is primarily in charge of Kitui sub-counties and KIMWASCO Companies in charge of Mwingi sub-counties. KITWASCO is in charge of managing water supplies from the Masinga-Kitui water which is an inter-county project while KIMWASCO is in charge of the Inter sub-County project of Kiambere-Mwingi. Other water points producing between 10 and 100 cubic meters daily are managed by Community Management Committees or the Community themselves. To increase accessibility of water to the residents of Kitui the water companies have the following plans to increase piping network and rehabilitate old ones which will cost Ksh1.8 billion.

The County has two sets of borehole drilling rigs. Excavators and other machineries for dam excavation and desilting are done using AMS machines and equipment. The desilting of dams and wells as well as boreholes will be done by the water services department and through private procurement as the department does not have adequate capacity to carry out all the work. The County will also examine its own processes in this area to determine how they can improve efficiency as the turnaround time is much slower than those achieved by private companies.

While the management of these companies is supposed to be self-funding there are challenges particularly in managing water losses and in collecting revenues. The community managed water

points are also self-financing, and a few have financial problems rendering the water source inoperational. Development expenditure on piping will come from the County resources.

The National authority in charge of water supplies to Machakos County and Kitui is called Tana Athi. Its plans include the Thwake Dam which will produce about 18MW of power, increase water supply to both Makueni and Kitui and irrigate about 3,175 HA in Kitui.

1.18.1 Water Sources

The main water sources include:

Equipped boreholes, Shallow wells with hand pumps, Earth dams/pans, Rock catchments, Roof catchments, Scoop holes and Piped schemes.

1.18.2 Water Supply Schemes

Kitui county has 2 water schemes namely; Kitui Water & Sewerage Company (KITWASCO); Kiambere-Mwingi Water & Sewerage Company (KIMWASCO)

1.18.3

Water sources and access

The percentage of households with water available in premises is 6.8% against national average of 24%. The picture is the same for time less than 30 mins with averages of 63.4% and 35.1% for Kitui respectively. The distance is known to average 7 kms and the County is focused on a programme to reduce this to 2 kms for purposes of achieving its water goals and facilitating the achievement of other goals in food security, sanitation, industrialization, wealth creation and health goals. The average distance to the nearest water point is 7 kms which is way below the international Standards on access to water. The County government shall institute measures and policies that will favor improvement of the existing situation. Therefore, the County government shall initiate programs for improvement of water access and also engage with partners to reduce distance to water points to the acceptable standard of 30 minutes' walk. The Bill on Human Rights lists water as one of the human rights. In volume terms those getting more than 3000 lts are more than the National average at 34.3% and the National average of 16.1% and yet in lower volumes Kitui lags behind the National average 65.4% compared to 83.2% for the National average. These are in line with the County having many water distribution points.

1.18.4 Sanitation

Proper sanitation and Safe human waste disposal is crucial for human health and well-being of people as it reduces the spread of disease causing germs. Human waste disposal facilities that are considered improved/adequate include; connection to main sewer, septic tanks, ventilated improved pit latrine, pit latrine with slab and composting toilets. Unimproved human waste disposal methods include flushing to other areas, using uncovered pit latrines or bucket toilets and open defecation

The households in Kitui with access to improved and unimproved sanitation services stand at 56.8 % compared at a national average of 65.3 percent. The distribution of households by type of main toilet facility is provided in Table 27 and 28.

1.19 Health Access and Nutrition

1.19.1 Health Access (Health Facilities, Health personnel and their distribution by sub county)

Kitui County has several hospitals and health centers to meet the health needs of residents, among them Kitui County Referral Hospital, Mwingi Sub-County General Hospital, Kitui Nursing Home, Neema Hospital, Jordan Hospital, mission-run hospitals such as Muthale Mission hospital and some private health centers. Kitui County has commissioned 23 new health facilities to reduce the distance, time and cost to accessing healthcare services.

There are 240 functional public health facilities in the County, accounting for 6% of the country's 4, 000 public health facilities. This exceeds the national average of 85 health facilities per County by 145 (63%) facilities. However, a health facility distribution analysis conducted by the former Commission for Implementation of the Constitution (CIC) showed that the 230 health facilities were unevenly and inequitably distributed in the County. In three Sub-Counties, Kitui

Central, Kitui West and Mwingi West, over 95% of the residents live within an average distance of 5 kilometers from their homes to the nearest health facility.

Similarly, due to terrain and condition of the roads, it takes people in these three Sub-Counties less than 30 minutes to reach health facilities in their areas as recommended by World Health Organization (WHO). In some areas of the under-served Sub-Counties, people travel distances of between 15-25 kilometers to access existing health facilities.

The County has initiated a process leading to the construction, opening and operationalization of 23 new health facilities to bridge the distance gap and ensure services are brought closer to the people.

1.19.2 Morbidity

The five main common diseases in the County are malaria 49%, diarrhoea 3.4%, stomach ache 5%, Flu 4.1% and Upper respiratory tract infection 7.7%. The main causes of morbidity for children under 5 years in the County are: URTI, diarrhoea, skin diseases, intestinal worms, confirmed malaria, and pneumonia. Patients over 5 years of age die due to URTI, skin diseases, confirmed malaria, diarrhoea, URTI, rheumatism and hypertension.

Additionally, HIV/AIDS is also a prevalent disease especially in the urban centers with a prevalence rate of 6.1%. The main Non-Communicable Diseases (NCDs) include cancer, diabetes, hypertension, benign prostrate hypertrophy (BPH) and arthritis.

1.19.3 Nutritional Status

The nutrition status of the population in the Kitui County remains poor as a result of frequent droughts resulting to food insecurity at the household level, sub-optimal infant and young child feeding practices, poor child care practices, inadequate access to health services and poor hygiene and sanitation practices in the communities. Wasting rates among children less than five years are at 4.6%. Stunting is currently at 38.2% (Kitui Nutrition Survey Sept 2013) which is way above the national average of 26%. Prevalence of underweight is 20.7% as compared to the national average of 16%.

The Infant and Young Child Nutrition (IYCN) practices are suboptimal across the County. Exclusive Breast Feeding (EBF) for six months stands at 45% (Kitui Nutrition Survey) while eHealth 85.4% had initiated breastfeeding within the first hour after delivery. Only 76.9% of the caregivers fed their children more than three times in a day indicating inadequate complementary feeding. The household dietary diversity score (HDDS) was 4.7%, with 95.2% of households accessing food by purchasing (Kitui Nutrition Survey, 2012); which implies that many households have limited options of livelihoods in the wake of low household incomes and high prices of staple food.

1.19.4 Immunization coverage

The immunization for Kitui County is generally low at 63 % compared to the National status 83.5 %. The trend has worsened from 75% in 2012 and as such the Ministry of Health and Sanitation is focusing on the health of children under one. In order to reverse the trend and improve immunization coverage to 80%, there has to be an increase in outreach services and an increase in the number of immunizing centers available, as well as ensuring adequate vaccine supply. In addition, there is an increase in prevalence rates of cervical cancer cases. Currently, Kitui County has had the pilot vaccination of the HPV vaccine.

1.19.5 Maternal health care

Kenya status declined in maternal mortality rate from 488/100,000 to 362/100,000 by 2018. The proportion of mothers delivering under the care of skilled health workers is only at 27.6%, which is below the national average of 42%. The Infant Mortality- 63/1000 live birth is high compared to the National to 39 per 1,000 live births and WHO status 41 in 2016. The Neonatal Mortality is 43/1000 live births.

1.19.6 Access to family planning services/Contraceptive prevalence

The percentage of mothers attending the WHO recommended minimum number of 4 antenatal clinics is 52.5%, compared to the country average of 52%. The proportion of mothers delivering under the care of skilled health workers is only at 27.6%, which is below the national average of 42%. Provision of reproductive health services needs to be brought closer to the people by setting up at least one well equipped and staffed maternity unit at the ward level.

Contraceptive acceptance stands at 58%. The low acceptability of contraceptives can be attributed to the prevailing culture, traditions and lack of awareness within the community which promotes negative attitudes towards the uptake of contraceptives.

1.19.7 HIV/Aids prevalence rates and related services

Kitui County is categorized as a medium burden County with HIV Prevalence of 4.2%, compared to National status 5.6 % with prevalence among female higher (5.7%) than male (2.5%). HIV and AIDS morbidity and mortality poses a serious challenge thus affecting negatively on labor force productivity and HIV orphan hood at 9%.

HIV TB Co-infection

The risk of developing TB is between 20 and 37 times greater in people living with HIV than among those who do not have HIV infection⁴. TB is responsible for more than a quarter of deaths among people living with HIV.

1.21 Sports, Culture and Creative Arts

The county has a total of 21 stadia and 40 play grounds which are based at the county levels.

1.21.1 Museums, Heritage and Cultural sites

In total Kitui county has one Museum and 3 heritage and cultural Sites.

1.21.2 Talent Academies

The county does not have any talent academy

1.21.3 Sports facilities

The Kitui County has 2 Resource Centers and 4 Social Halls

1.21.4 Libraries /information documentation centres/ Citizen service centres

The county has 3 libraries based at kitui, migwani and mwingi

1.21.5 Registered traditional herbalists and medicine-men

The county doesn't have any registered traditional herbalists and medicine-men.

1.21.6 Community Organizations/Non-State Actors

The county has a total of 100 community organizations, 150 Faith Based Organizations and 2000 Community Based Organizations

1.21.7.Cooperative Societies

There are 91 registered cooperative societies and among them only 40 are active while the dormant are 50. The remaining one collapsed.

1.21.8 Public Benefits Organizations (PBOs) i.e. NGOs, CBOs, INGOs, FBOs and special interest groups, etc.

There are several NGOs, CBOs, INGOs, FBOs and special interest groups working in the County. Majority of these organizations intervene in the social sector mainly in the informal settlements. These NGOs also contribute

considerably towards community empowerment, protection of human rights awareness creation and civic education. Coordination of these organizations is a challenge that needs to be addressed. Most women groups operate revolving funds (merry go round, table banking). The level of activity of women and youth groups in the County depends on funding from various donors and government funded initiatives.

1.21.9 Development Partners e.g. UN Agencies, USAID, World Bank, etc. and the sectors they support

They provide funding, capacity building and technical assistance in the implementation of projects and programme. Some of the development partners include; World Food Programme, FAO, UNDP, World Vision, CARITAS, ACK, DANIDA, CEFA, AMREF, REDCROSS, Water Tower Agency, USAID, SASOL, UNICEF, Hand in Hand, Compassion International, Farm Africa, KUMEA, Sweden, AVIA PLUS, ADS, GOAL, ADRA, CCS, Afya Halisi, CHRIS and EU.

1.21.10 Youth empowerment and social inclusion (Youth empowerment centres)

There are various youth employment centres in the County located in different wards. Some of the wards with youth empowerment are; Athi, Chuluni, Endau/ Malalani, Ikutha, Kiomo Kyethani, Kiomo Thaana, Kisasi, Kivou, Kyangwithya east, Kyangwithya west, Miambani, Mui, Mulango, Mumoni, Mutitu Kaliku, Ngomeni, Nzambani, Township, Tseikuru, Voo/Kyamatu and Zombe/Mwitika ward.

1.23.1 Number of Orphans and Vulnerable children (OVCs)

The vulnerable children groups/categories in the County can be listed as follow, Child headed households, Children living in extreme poverty, Children living with grandparents, orphaned children, Children at risk of FGM, child marriage, Children living with or affected by disability, child pregnancy, children living with HIV or at risk of infection, children living with HIV positive caregivers, children living with aged/elderly caregivers, Children dropping out of schools and single parent's children. The current statistics of vulnerable children per category shows that 5.5 percent of children under the age of 18 years and 3.8 percent under the age of 14 years.

1.23.2 Social net programmes in the County

The National Government supports three cash transfer programmes in Kitui County. These are Older Persons Cash transfers (OP-CT), Orphans and Vulnerable Children (OVC-CT) and Persons with severe disabilities (PWSD-CT). Table 41 below summarizes the number of

recipients by sub-County. The amount disbursed for cash transfers in 2016/17 was Ksh. 611,160,000.

CHAPTER TWO: LINKAGES WITH VISION 2030 AND OTHER PLANS

2.1 Overview

This chapter outlines linkages between this CIDP, the Kenya Vision 2030 and other plans including the third Medium Term Plan (2018-2022), national policies, and County sectoral plans as well as international commitments such as the Sustainable Development Goals (SDGs). The purpose is to enhance policy coherence and ensure that both levels of government and other stakeholders work together towards the realization of the goals of Vision 2030. The Vision 2030 envisages that by 2030 Kenya will be a high middle-income country that is globally competitive, with the population enjoying high living standards, in a clean and secure environment.

The Constitution of Kenya 2010 created a two-tier system of governance, national and devolved County governments that are distinct and interdependent. The new governance landscape requires a paradigm shift in development planning. Integrated development planning in this context brings together the different dimensions of development including economic, social, environmental, legal and spatial aspects, and its success depends on effective coordination of efforts of national and devolved levels of government, and other relevant stakeholders to meet the development needs of the society. The specific priority areas of cooperation and linkages with different policy and strategy documents are outlined below.

2.2 Linkage of the CIDP with the Kenya Vision 2030 and Third Medium-Term Plan

The Kenya Vision 2030 is the long-term development blueprint for the country that outlines the overall policy and strategic development agenda for political, economic, and social transformation and development of Kenya including key flagship projects. The Vision has three Pillars, namely, Economic, Social and Political. Under the Economic Pillar, Kenya aims to increase economic growth by 10 percent per annum over the Vision 2030 period. This high growth is to be achieved by adding value to products and services in the critical sectors of the economy including tourism, increasing value in agriculture, manufacturing, Business Process Outsourcing (BPO), wholesale and retail trade, and financial services. The Social Pillar aims to foster a just and cohesive society that enjoys equitable development in a secure and clean environment by investing in seven critical social sectors. These are: education and training; health; water and sanitation; environment; housing and urbanization; gender, youth and vulnerable groups; and equity and poverty eradication. The political pillar, on the other hand, envisions a country with a democratic political system that is issue based, people-centered, results-oriented and accountable to the public. The three pillars are anchored on macroeconomic stability; equity and wealth creation; governance reforms; infrastructure development; energy; science; technology and innovation (STI); land reforms; public service reforms; human resource development; and security.

The Kenya Vision 2030 is implemented through five (5) year successive Medium -Term Plans. The First and Second Medium Term Plans (MTP) covered the period 2008-2012 and 2013-2017 respectively. In the Second MTP, a seventh priority sector, oil and other mineral resources, was introduced under the economic pillar following the discovery of significant fossils fuels and other mineral deposits in the country. The Third Medium-Term Plan (MTP III 2018-2022), aims to put the economy on a high growth path and foster the social-economic transformation envisaged in Vision 2030. Under the Economic Pillar, MTP III has prioritized Blue Economy as

an emerging sector to support the realization of rapid economic growth and diversification of the economy.

Also, the Third MTP gives primacy to the implementation of the “Big Four” priority areas of the Jubilee Administration, namely: manufacturing; housing; food security; and universal health coverage. The Big Four development agenda growth targets include the following:

- Guaranteeing food security and nutrition to all Kenyans by 2022;
- Raising manufacturing sector’s share to GDP to 15 percent by 2022;
- Universal Health Coverage thereby ensuring quality and affordable healthcare to all Kenyans; and
- Developing at least five hundred thousand (500,000) affordable new houses for Kenyans by 2022.

The Kitui County Integrated Development Plan 2018-2022 has mainstreamed the development agenda outlined in the Governor’s Manifesto and accords priority to programmes and projects that support the goals of the Third Medium-Term Plan (MTP III 2018-2022) and Kenya Vision 2030. The Governor’s Manifesto has five pillars for the social-economic and political transformation of Kitui County. These are food security and water; Universal Health Coverage (UHC); education and training; Women, Youth & People Living with Disabilities (PLWDs) Empowerment; and Wealth Creation. The Pillar on Wealth Creation supports the realization of the Third Medium-Term Plan goals on expanding manufacturing and is in tandem with the ‘Manufacturing’ development Agenda under the ‘Big Four’ discussed above.

The County will give priority to supporting value addition in agriculture and livestock industries. It is recognized that food security cannot be guaranteed without provision of water due to the semi-arid climatic conditions in the County. In this regard, irrigation and programmes to enhance access to water such as water harvesting; drilling of boreholes and extensions of water piping will receive increased attention. Investments in education and training, and Women, Youth & PLWDs Empowerment support the realization of the foundational goals of the Vision 2030 and promotion of equitable and inclusive growth. The Second Medium-Term Plan 2013-2017 had prioritized the exploitation of Coal in Mui Basin.

2.3 Linkage of the CIDP with other Plans

National economic policy and planning is a function of the National Government as outlined under the Fourth Schedule of the Constitution of Kenya 2010. Consequently, the programmes and projects presented in the CIDP are aligned with national policies and plans. During the plan period, the County Government will continue to align relevant strategies and operations with national legal and policy framework.

Under the provisions of the County Government Act, the County is expected to have the following plans: County Sectoral Plan; County Spatial Plan; and City and Urban Areas Plan. The relevant plans will be developed and aligned with the CIDP, notably, the County Spatial Plan that is aligned with the National Spatial Plan (NSP) 2015-2045. Urban development planning is among the priorities in the Kitui County Integrated Development Plan 2018-2022. This will contribute to the realization of sustainable urban development consistent with the goals of the

NSP 2015-2045 and Sustainable Development Goal eleven (11). The CIDP 2018-2022 has also prioritized access to water thus contributing to the realization of improved water and sanitation to all by 2030. The County Government will work with the National Government and neighboring counties in realizing the development of the water projects found in the Water Master Plan 2030, namely, Water to Mwingi from Kiambere Dam; Thwake Dam; Water to Kitui from Masinga Dam; and the High Grand Falls Multipurpose Dam. It is also expected that the National Government will work with the County Government of Kitui in developing the Mutuni and Kitimui dams as envisaged in the Water Master Plan 2030.

2.4 Linkage of the CIDP with the Sustainable Development Goals (SDGs), Sendai Framework and African Union Agenda 2063

The Kitui CIDP 2018-2022 has outlined programmes and projects that will be implemented to facilitate the attainment of Agenda 2030 for Sustainable Development and the 17 Sustainable Development Goals (SDGs). Further, the County will carry out awareness creation on the relevant SDGs and prepare half-year reports on the status of implementation of the SDGs. Table 42 summarize the Kitui CIDP 2018-2022 Strategic Priorities and linkages with SDGs.

-Ensure effective, accountable, and transparent institutions at the County level -Combat corruption at the County level - Ensure participatory and representative decision-making at the County level	Goal 16: Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels
-Strengthen own source revenue mobilization	Goal 17: Strengthen the means of implementation and revitalize the Global Partnership for Sustainable Development

Various programs and projects outlined in Kitui County CIDP 2018-2022 support the realization of the aspirations and the goals of the Sendai Framework and African Union Agenda 2063. The African Union Agenda 2063 has seven (7) aspirations, namely:

- Aspiration 1: A prosperous Africa based on inclusive growth and sustainable development;
- Aspiration 2: An integrated continent, politically united based on the ideals of Pan Africanism and the vision of Africa's Renaissance;
- Aspiration 3: An Africa of good governance, democracy, respect for human rights, justice and the rule of law
- Aspiration 4: A peaceful and secure Africa
- Aspiration 5: An Africa with a strong cultural identity, common heritage, values and ethics

- Aspiration 6: An Africa whose development is people-driven, relying on the potential of African people, especially its women and youth, and caring for children; and
- Aspiration 7: Africa as a strong, united, resilient and influential global player and partner

The Sendai Framework for Disaster Risk Reduction (DRR) 2015-2030 outlines four priorities for action to prevent new and reduce existing disaster risks. They are: understanding disaster risk; strengthening disaster risk governance; investing in disaster reduction for resilience; and enhancing disaster preparedness. Kitui County will enact proper legislation to establish a Fund to support mitigation and adaptation initiatives to address climate change related risks. In the Kitui CIDP, activities within the sector of environment and natural resources will also enhance climate change adaptation.

CHAPTER THREE: REVIEW OF IMPLEMENTATION OF THE PREVIOUS CIDP

3.1 Introduction

This chapter gives a brief overview of the implementation of the previous CIDP. The chapter includes the analysis of the County revenue streams (equitable share, grants, own source revenue) and compares the budget versus actual. It also enumerates County expenditure analysis by sector/ subsector and compares budgeted versus actual. It gives a summary of the key achievements versus planned targets focusing on outcomes and outlines the challenges in the implementation of the plan, and the lesson learned.

3.2 Status of Implementation of the Previous CIDP

3.2.1 Analysis of Revenue Streams

During the period July 2013 to June 2014, the County received Ksh. 5.3 billion as the national equitable share and raised Ksh. 255.2 million from local sources. The County did not receive any grants but had Ksh. 176.6 million as balance brought forward from FY 2012/13. Total local revenue raised during the period under review was 47.3 percent of the annual local revenue target. The equitable share of revenue increased to Ksh. 7.84 billion in 2016/17 and is estimated to increase by 10.3 percent to Ksh. 8.65 billion in 2017/18. The equitable share of revenue has increased by an average of about 12.5 percent per annum over the last five years. Local revenue collection increased by 25.6 percent in 2014/15 and further by about 29.9 percent in 2015/16 before declining by 24.2 percent in 2016/17. The County collected Ksh. 335.12 million in 2017/18.

Table 43 summarizes the trends in revenues over the five-year period 2013/14-2017/18. Over the period 2014/15-2016/17, local revenue collection averaged about 53 percent of the annual targets. This under-performance in revenue poses serious challenges for smooth budget implementation and needs to be addressed as discussed in Chapter 5. The main local sources of revenue include single business permits, advertising, market fees, parking fees, land rates, earthworks, Cess and alcohol drinks licenses.

Table 43: Revenue Streams (Ksh. Millions)

Revenue Streams	2013/14	2014/15	2015/16	2016/17	2017/18
Equitable share	5,315.30	6,340.88	7,267.27	7,841.48	8,652.3
Local Revenue	255.2	320.52	416.19	315.35	335.12
Conditional grants	-	34.61	250.70	457.72	584.16
Total	5,570.5	6,696.01	7,934.16	8,614.55	9,571.58

Source: Kitui County Treasury *Budget estimates

An analysis of the composition of county revenue reveals that the equitable share accounts for about 92 percent of total revenue. Conditional grants have been growing in importance and have overtaken local revenue sources. Grants as a share of total revenue increased from 0.5 percent in 2014/15 to 5.3 percent in 2016/17, and the share is estimated to increase to 7.5 percent in 2017/18. The main components of the grants are Road Maintenance Fuel Levy, Free Maternal Healthcare, and grants from development partners. The notable increase in 2016/17 is attributed to World Bank loan to supplement financing of County Health Facilities; Road Maintenance Fuel Levy Fund; Free Maternal Health Care Allocation; and allowances for medical staff (Table 44)

Table 44: Kitui County Analysis of Conditional Grants FY 2015/16 -2016/17

3.2.2 Analysis of Expenditure

During the period 2013/14-2016/17 total expenditure by the County more than doubled from Ksh. 3.41 billion to Ksh. 8.31 billion in 2016/17. Recurrent expenditure (personnel emoluments and operations and maintenance) as a share of total expenditure averaged fell from 85.2 percent in 2013/14 to 47 percent in 2016/17. This change in the composition of expenditure has enabled the County to meet the fiscal responsibility principles outlined in the PFM Act, 2012 and the PFM (County Regulations) 2015, which stipulates that county government's actual expenditure on development shall be at least thirty percent. This principle has been met since 2014/15 (Table 45).

Table 45: Expenditure by Economic Classification (Ksh. Millions)

Expenditure Categories	2013/14	2014/15	2015/16	2016/17	2017/18
Personnel Emolument	1,841.70	2,234.24	2,555.92	2,821.77	3,628.49
Operations and Maintenance	1,064.06	1,702.27	1,542.78	1,804.19	2,349.65
Development	506.28	2,964.75	3,771.92	3,688.65	3,341.76
Total	3,412.04	6,901.26	7,870.62	8,314.61	9,319.90
Personnel Emoluments	54.0 %	32.4%	32.5%	33.9%	38.9%
Operations and Maintenance	31.2%	24.7%	19.6%	21.7%	25.2%
Development	14.8 %	43.0%	47.9%	44.4%	35.9%
Total	100%	100%	100%	100%	100%

Source: Kitui County Treasury

Further, the PFM (County Governments) Regulations 2015 requires that county governments maintain employee compensation levels at not more than 35 percent of their total revenue. While employee compensation has remained within the threshold of thirty-five percent, the County is facing increasing wage bill pressure. In 2016/17, personnel emoluments as a percentage of revenue including grants stood at 36.6 percent and as a percentage of revenue excluding grants at 38.7 percent (Figure 4). Data for 2017/18 is provisional but trends in actual expenditure and revenue suggest that the County might not be able to meet the threshold in the current fiscal year.

Figure 4: Personnel Emoluments as % Revenue

Data Source: Kitui County Treasury

The increasing wage bill pressure points to the need for implementation of the Capacity Assessment and Rationalization Programme (CARP) to ensure that the County Government functions are properly structured and staffed, and there are no excesses in the County Public Service.

As assessment of the budget absorption rate, which is calculated as actual expenditure as a percentage of approved budget reveals that there is room for improvement. The recurrent expenditure for the period 2013/14-2016/17 represented an average absorption rate of 84.5 percent. The absorption rate for development expenditure for the same period is 54 percent. However, it is important to note that the absorption rate for the development budget has increased significantly over the years. In 2013/14, the absorption rate was estimated at 17.6 percent and increased to 58 percent in 2014/15 and further to 70 percent in 2016/17 (Figure 5). The absorption rate for total County Government's budgets for 2016/17 for recurrent and a

development budget was 89.6 percent and 65.3 percent respectively. Accordingly, Kitui County's absorption rate for the recurrent expenditure was below the national average. The development budget absorption rate was above the average for all counties.

Figure 5: Budget Absorption Rate 2013/14-2016/17

Data Source: Kitui County Treasury

Analysis of expenditure allocations by sector between 2014/15 and 2016/17 reveals that the four leading sectors are: Health and Sanitation; Office of the Governor; Lands, Infrastructure & Urban Development; and Agriculture, Water, and Irrigation. The other sectors that received an average of more than five percent of budget allocation are County Assembly; Basic Education, Training, and Skills Development; and Administration & Coordination of County Affairs (Table 46).

3.2.3 Key Achievements

According to a review of the implementation of the CIDP 2013-2017 completed in November 2017, some of the key achievements include:

- Completion of stalled health facilities and construction of new facilities including the elevation of Ikutha health center to a level four (4) hospital through the expansion and equipping of the hospital;
- Addressing youth unemployment problem through the implementation of the Access to Government Procurement Opportunities (AGPO) and 100% matching grant to support youth in starting businesses;
- Investment in small honey industries, provision of open irrigation kits, provision of greenhouses to increase food production and farmers' income;
- Creation of cooperatives to facilitate access to credit;
- Tree planting to increase forest cover including legislative measures to regulate the cutting of trees and sale of charcoal;
- Increased access to water through the provision of water tanks to public health centers, ECDE Centres and market centers, drilling of boreholes and construction of earth dams;
- Increased enrolment in ECDE centres from 65,000-88,106;
- Establishment of a rescue center for street children;
- Facilitated the issuance of title deeds;
- Installation of street lights in major towns;
- Construction of bridges and culverts, and markets; and
- Mapping of existing tourism potential areas.

3.2.4 Challenges faced in the implementation of the CIDP

The key challenges faced during the implementation of the First Generation CIDP include:

- Mistrust between the County Assembly and the County Executive including lack of appreciation of the roles and responsibilities of the two arms of the County Government especially on matters regarding planning and public financial management;
- Human resource challenges including inadequate technical staff to implement planned projects, and lack of clear mandate in intergovernmental relations regarding the recruitment, discipline, and transfer of employees in some sectors especially health;
- Financial challenges to the implementation of the CIDP have included delayed disbursements by the National Treasury, local revenue has been below the planned targets, and inability to attract alternative sources of finance like Public-Private-Partnerships; and

- There were operational challenges regarding aligning the CIDP to departmental goals and programmes, and performance management tools were not well embraced to support the implementation of the plan.

3.2.5 Lessons Learned

The experiences in the implementation of the CIDP 2013-2017 and taking into account the challenges discussed above lead to the following lessons:

- There is a need for induction and capacity building for members of the County Assembly and Executive on their roles and responsibilities in planning and public financial management;
- There is need to address challenges related to human resource capacity and management for effective implementation of the CIDP;
- Capacity building for staff on financial management, procurement, government accounting procedures and financial reporting is required. Also, there is need to enhance project prioritization in the context of limited resources, and enhance local resource projections; and
- Operationally, each department should develop a strategic plan aligned with the CIDP. Also, the County should institutionalize a monitoring and evaluation system together with a performance management framework to support the implementation of the CIDP.

CHAPTER FOUR: COUNTY DEVELOPMENT PRIORITIES AND STRATEGIES

4.1 Introduction

This chapter gives a brief overview of the spatial development framework, key County development priorities, strategies and programmes and projects as identified by the stakeholders in the County. The Chapter also presents departmental result's tracking matrix with key performance indicators, planned targets and resource requirements.

4.2 Spatial Development Framework

This section explains aspects of the Spatial Development Framework for Kitui County. The County Governments Act, Section 110, stipulates that all County governments should develop spatial plans that are based on Geographic Information Systems (GIS). A spatial plan for the County will provide a policy framework for optimal and sustainable land use within which the challenges of urbanization, environmental degradation, rural development, infrastructure development and utilization of natural resources can be addressed. Spatial planning will also contribute to the realization of the Sustainable Development Goals (SDGs) goal 11 on urbanization. The goal is to “make cities and human settlements inclusive, safe, resilient and sustainable”. The County spatial plan will also be aligned with the Kenya National Spatial Plan 2015 – 2045 which provides the national integrated spatial framework for sustainable development.

In developing the spatial plan, the County will ensure that thematic areas which are provided in the National Spatial Plan 2015 – 2045 are adequately covered within the County context. The thematic areas are described below.

- The plan will identify the potential growth areas in the County. The growth areas should include an increase in housing in urban areas, upgrade of existing infrastructure and increased social service delivery among others;
- The spatial plan will enhance the County's competitiveness by providing a framework through which the County can maximize the benefits arising from its strategic geographic location, natural resources, and emergence of Information and Communications Technology (ICT). The plan will contribute towards modernization of agriculture by leveraging on the power of GIS, spatial analysis will be undertaken by combining sources of water, soil types and crop characteristics to establish high potential areas for agricultural development and irrigation;
- Spatial analysis will help in developing tools for enhancing tourism development, such as digital and hardcopy maps that show tourist sites within the County;
- Improve human settlements both in rural and urban areas;
- Enable the County to protect and conserve the natural environment;
- Provide a means for upgrading and maximizing the transport network in the County;
- The spatial plan will provide a basis for providing critical infrastructure such as water and sewer systems, training and research facilities, and ICT such as internet hotspots, strategic computer resource centres among others; and
- The spatial plan will also provide a basis for assessing industrial potential of the County.

The spatial plans will include maps and descriptions of various thematic areas. Some of the thematic areas are shown in Table 47.

Table 47: County Spatial Development Strategies by Thematic Areas

Thematic Area	Overview/ Current Status	Policy Strategy	Potential Geographical Areas	Lead Agencies/ Departments
Livestock Keeping	Kitui falls within areas with large scale livestock production in the National Spatial Plan	Develop clear guidelines to enhance livestock keeping and production	Kanyangi, Kwa-Vonza, Kyuso, Tseikuru, Mumoni.	Agriculture, water & livestock

4.4 Development Priorities and Strategies

This section provides a summary of the development priorities by sector as identified in sectoral plans and during stakeholder consultative forums. The development priorities, programmes and projects are aligned with Kenya Vision 2030, MTP III and the County Transformative Agenda. Emphasis is given to programmes and projects aimed at fulfilling Article 56 of Constitution of Kenya (COK), achieving the aspirations of Sustainable Development Goals (SDGs), Vision 2030, Governor’s Manifesto, and African Union Agenda 2063.

During the period of the CIDP, the County Government of Kitui will give high priority to policies, programs and projects with the highest potential for rapid economic and social transformation. At the heart of the development agenda are five pillars, namely: food security and water; healthcare, education and training; empowerment of women, youth & People with Disabilities (PWDs); and wealth creation. The other priority areas include infrastructure development, housing, governance, and climate change consistent with national development goals and international commitments. The various sectors will play different roles in the delivery of the development agenda as outlined below.

4.4.1 Office of the Governor

The mandate of the Office of the Governor is to provide overall leadership in the development and governance of the County.

Vision

To be a prosperous County with vibrant rural and urban economies whose people enjoy high quality of life.

Mission

To provide effective County services and an enabling environment for inclusive and sustainable socio-economic development and improved livelihoods for all

Sector Goals and Priorities

The sector goal is to provide overall policy and leadership direction to facilitate County prosperity and competitiveness. The broad priorities of the Office of the Governor include promotion of socio-economic development, building County disaster resilience, enhancement of County image, governance, and effective public service delivery and performance. There are multiple constraints that hamper the transformation of Kitui County. These include low resource base, harsh climatic conditions, infrastructure gaps, high levels of poverty and low access to social economic services such as education, health, water & sanitation, and energy.

The priority programs and projects for the period 2018-2022 are summarized below.

4.4.4 Health and Sanitation

The sector has two subsectors namely, health and sanitation.

Vision

A County with healthy residents that embrace preventive health care and have access to affordable and equitable health care services.

Mission

To provide accessible, affordable, quality health care services to all through strengthening health systems, scaling up health interventions, partnership, and innovation and empowering communities to foster sustainable social and economic growth.

The County through the Ministry of Health plans to increase access to healthcare services through interventions such as introduction of health insurance cover and encouraging residents to obtain NHIF comprehensive cover, equipping and adequately staffing the existing healthcare facilities.

Sector Goals and Strategic Priorities

The sector will focus on increasing access to affordable and quality healthcare. During the CIDP period 2018-2022, the sector will prioritize Universal Health Coverage (UHC), health promotion, disease prevention and upgrading of the existing operational health facilities. Mobile clinics will be used to bring services closer to under-served areas.

The sector plans to improve healthcare information system in liaison with the National Government and upgrade the County's two main hospitals to referral level. The sector will work with other stakeholders to sensitize the community on hygiene through building of pit-latrines, using clean water, immunization, vaccination and prevention of diseases. There will be close collaboration between the sector, private sector, NGOs and CBOs who are involved in health service provision. The provision of health services is performed at different levels; Tier 1 Community level whose interventions are led by Community health volunteers (CHVs), Tier 2 Dispensaries whose players are Community Extension Health Workers (CHEWs), Tier 3 Health Centres players who are mainly Community Health Extensions (CHEWs), Tier 4 Hospitals performing specialized professional skills and referral functions.

The sector programmes are broadly categorized into three areas as Preventive and Promotive services, Curative Services and General Administration, Planning and Support services.

Strategies for Mainstreaming Cross-cutting Issues

Kitui County has approximately 1600 annual new HIV infections and plans to reduce the incidences by 50 percent by 2022. This will be achieved through channeling of resources to interventions like early infant diagnosis, behavioral changes and communication, counselling and testing, good referrals and linkages to care and treatment.

Women have been more vulnerable to HIV than men hence the proportions of women living with HIV are higher compared to men. Anti-retroviral drugs can substantially reduce AIDS deaths if used properly and they can also reduce HIV transmission. The County will embark on improving access to rehabilitative services. The sector is committed to improving the health of all women of reproductive age. The County places a strong emphasis on safe delivery, improved family planning uptake, reduction of maternal and perinatal deaths and provision of free maternity services and deliveries under skilled attendance.

4.4.10 Environment and Natural Resources

Introduction

The sector has three subsectors, namely; Environment; Energy; and Mineral resources.

Vision and Mission

The vision is to be the leading County in the utilization of electricity, alternative/renewable sources of energy and gainful utilization of minerals in a sustainably managed and healthy environment. The mission is to improve the livelihoods of Kitui people through the provision of varied and reliable sources of affordable energy and increased levels of minerals investments in a sustainably managed environment.

Sector Goals and Priorities

During the plan period, the sector will promote and support measures towards a clean and sustainable exploitation of natural resources through:

- Effective environmental planning and coordination;
- Improved waste management;
- Promoting environmental awareness and capacity building;
- Tree growing to increase forest cover;
- Implement measures to enhance resilience to climate change and variability;
- Water Catchment Conservation and Rehabilitation;
- Promotion and adoption of renewable energy technologies; and
- Promote investment in the mining sector.

The tables below summarize the programmes that will be implemented in the sector during the Plan period.

1. ENVIRONMENT SECTION

Programme Name: Waste Management

Objective: To manage waste disposal and formulation of policies

Impact: Improving quality of life through provision of clean environment

Sub Programme	Key Outcome	Key performance Indicators	Baseline	Planned Targets					Total Budget (Ksh. Millions)
				Year 1	Year 2	Year 3	Year 4	Year 5	
Awareness creation on Town/Market cleanliness	Improved awareness on market cleanliness and hygiene	Number of sensitization cleanups undertaken	51	18	20	22	24	17	30
Establishment of waste disposal programme in all towns	Conducive business environment	Number of towns under waste disposal programme	0	10	10	10	10	10	20
Identification of institutions/buildings with asbestos and any other hazardous waste for advice on safe disposal	Improved environmental safety and health	Number of institutions/buildings identified	0	2	4	6	8	2	30
Development of County waste management legislative framework	Streamlined waste management and disposal	Number of draft policy document and a bill in place	0	1	1	-	-	-	20
Total									100

Programme Name: Environmental management and awareness

Objective: To Increase environmental conservation awareness

Impact: increased environmental conservation awareness

Sub Programme	Key Outcome	Key performance Indicators	Baseline	Planned Targets					Total Budget (Ksh. Millions)
				Year 1	Year 2	Year 3	Year 4	Year 5	
Establishment of environmental clubs and eco schools in institutions of learning	Increased institutional environmental management	No. of environmental clubs and eco schools established	0	8	10	16	20	24	10
Mobilize public participation in environmental conservation activities	Increased social and environmental safeguards for all projects within the County	No. of public participation meetings held	20	10	12	15	17	10	16
Develop and review policies to enhance compliance to environmental regulations including charcoal management Act, wood fuel value chain policy, sand harvesting bill and noise pollution regulations	Streamlined environmental legal framework	No. of legal documents reviewed and developed	2	2	2	1	1	0	30
Commemoration of international environmental days	Increased awareness on environmental conservation	Number of events commemorated	4	4	4	4	4	4	100
Total									156

Programme Name: Tree Growing and Forest Conservation

Objective: To Increase forest cover throughout the County

Impact: Mitigation of climate change

Sub Programme	Key Outcome	Key performance Indicators	Baseline	Planned Targets					Total Budget (Ksh. Millions)
				Year 1	Year 2	Year 3	Year 4	Year 5	
Identify and promote drought tolerant tree species for propagation	Increased forest cover with drought tolerant tree species	No. of drought tolerant tree species identified and promoted	3	4	4	4	3	3	70
Promote community participation in growing trees	Increased awareness on tree growing	No. of tree champions involved	20	25	30	40	45	30	75
Promote commercial growing of high value and multipurpose tree species	Increased adoption commercial tree growing for wealth creation eg, melia volkensii – i.e. mukau, tamarindus indica - kithumula, etc	No. of high value and multipurpose tree species promoted	100,000	100,000	100,000	100,000	100,000	100,000	50
Establish tree growing nurseries	Increased forest cover	Number of tree growing nurseries established	0	0	40	40	40	40	10
Development of County forest and farm forestry conservation policies and bills	Streamlined and harmonized forest management	No. of policies and bills developed	0	1	1	1	0	0	30
Forest resource mapping	Improved county forest cover	No. of forest units protected	0	0	3	5	8	8	30
Total									265

Programme Name: Climate Change Adaptation and Mitigation

Objective: To Improve communities' adaptation capacity and resilience against impacts of climate change and variability

Impact: climate change resilient communities

Sub Programme	Key Outcome	Key performance Indicators	Baseline	Planned Targets					Total Budget (Ksh. Millions)
				Year 1	Year 2	Year 3	Year 4	Year 5	
Awareness creation on climate change adaptation and mitigation measures	Improved community's adaptation and resilience to climate impacts	No. of awareness meetings held.	11	40	40	40	40	40	200
Establishment of a Disaster Risk Reduction Programme	Lowered cost of humanitarian assistance and economic loss.	Number of DRR policies formulated and operationalized	0	0	0	1	0	0	10
Development of Kitui County Climate change legislative framework.	Streamlined climate change activities	No. of legislations developed	1	1	1	1	1	1	10
Operationalization of climate change fund regulation	Improved management and harmonization of climate financing activities	No. of projects implemented under KCCCF	0	0	20	20	20	20	300
Total									520

Programme Name: Alternative livelihood for the communities affected by the charcoal ban

Objective: To sustain the charcoal ban

Impact: Improved Livelihoods for the Communities Affected by the Charcoal Ban

Sub Programme	Key Outcome	Key performance Indicators	Baseline	Planned Targets					Total Budget (Ksh. Millions)
				Year 1	Year 2	Year 3	Year 4	Year 5	
Establishment of commercial tree nurseries, poultry and goats' rearing	Improved livelihoods for the communities affected by the charcoal ban	Number of households benefitting	800	800	1600	1600	1600	1600	200
Total									200

Programme Name: Water Catchment Conservation and Rehabilitation

Objective: To protect and rehabilitate natural water sources

Impact: Improved water catchments

Sub Programme	Key Outcome	Key performance Indicators	Baseline	Planned Targets					Total Budget (Ksh. Millions)
				Year 1	Year 2	Year 3	Year 4	Year 5	
Conservation and protection of river banks and catchment areas (in partnership with D.A.s) along major Rivers and streams e.g mumaki, ecosystem Tyaa,, Thua, and Enziu Rivers	Enhanced water catchment conservation and rehabilitation sites	Number of catchment sites conserved	1	1	2	2	2	2	100
Rehabilitation of Mumoni hills, Endau hills and Nuu springs, Mutha hills, Kwa Vonza/ Kiima Kimwe, Ndilili Hills in Kanziko, Ukasi water catchment (in Partnership with D.A.s)	Improved water catchment areas	No. of water catchments sites rehabilitated	0	1	1	1	3	1	80
Promote utilization and protection of rock catchments	Enhanced water sufficiency in rural areas	No. of rock catchments protection	0	1	2	3	2	2	700
Total									880

2. ENERGY SECTION

Programme Name: Promotion and adoption of renewable energy technologies

Objective: To enhance use of renewable energy technologies

Impact: Enhanced use of renewable energy technologies

Sub Programme	Key Outcome	Key performance Indicators	Baseline	Planned Targets					Total Budget (Ksh. Millions)
				Year 1	Year 2	Year 3	Year 4	Year 5	
Establishment of energy centers for alternative energy technologies	Enhanced adoption of clean energy	No. of energy centres established	0	0	2	2	2	2	100

Sub Programme	Key Outcome	Key performance Indicators	Baseline	Planned Targets					Total Budget (Ksh. Millions)
				Year 1	Year 2	Year 3	Year 4	Year 5	
Installation of solar security lights	Improved security and extended working hours	No. of security lights installed	800	800	800	800	800	800	350
Installation of Solar powered water pumps at community level boreholes and irrigation schemes	Enhanced water supply at rural areas	No. of solar powered pumps installed	17	40	40	40	40	40	1,000
40 Mwe Solar power plant establishment in partnership with LOOOP Inc. Japan	Enhanced energy sufficiency, stability and reliability	PPA, Approval of EOI, Gazettement of the notice to establish the power plant	0	0	0	0	0	1	40,000
Electrification of off-grid village polytechnics, health centres with solar PV systems/mini-grids (in collaboration with Development Agencies)	Enhanced service delivery and improved performance	No. of institutions connected with electricity	0	8	8	8	8	8	500
Distribution of Pico Solars kits and subsidized LPGs Cylinders to needy households	Improved health and Longer studying hours for students/pupils	No. of beneficiary households	0	800	800	800	800	800	5
Community sensitization on wood-fuel production e.g commercial briquettes and wood pellets	Increased awareness on forest conservation	No. of sensitization meetings held	16	20	20	20	20	20	200
Promotion of sustainable and efficient production of briquettes	Enhanced wealth creation and waste management	No. of briquettes produced	20	40	40	40	40	40	400

CHAPTER FIVE: IMPLEMENTATION FRAMEWORK AND RESOURCE MOBILISATION STRATEGY

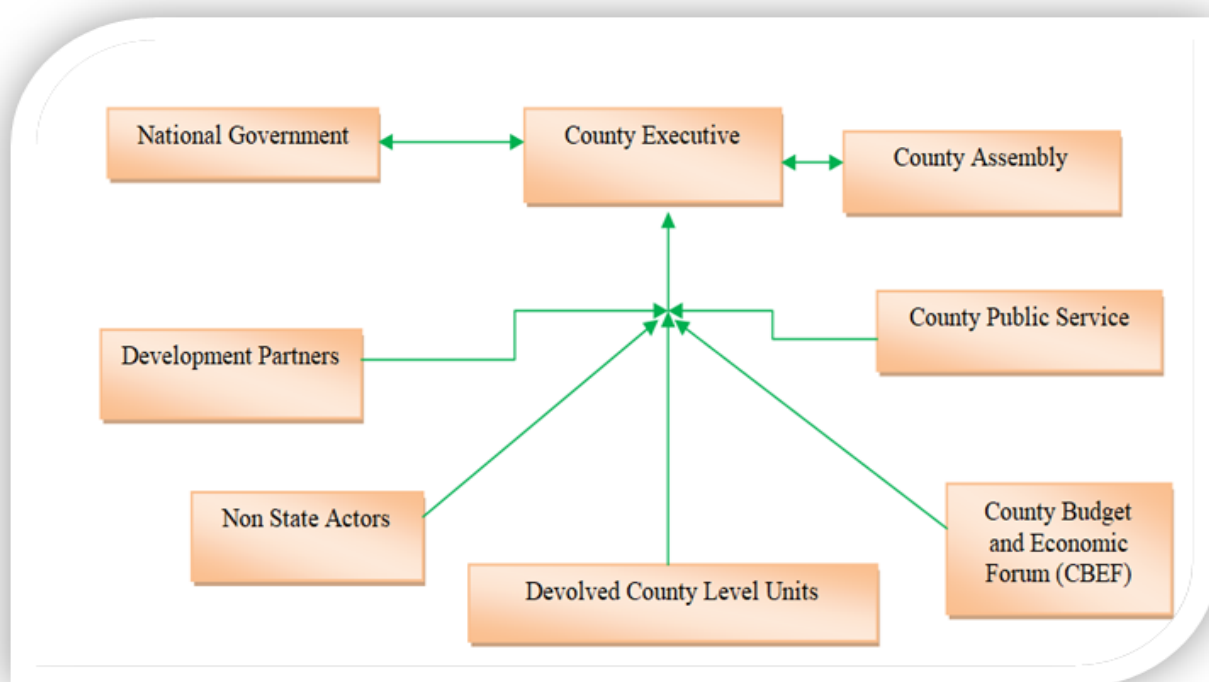

5.1 Introduction

This chapter gives an overview on the CIDP implementation framework, and institutions responsible for the actualization of the plan. It outlines the institutional structure and stakeholders in the County and their roles in the implementation of the Plan. The chapter presents resource mobilization framework and strategies for managing the resources within the county as well as strategies for raising revenue, asset management, financial management, and capital financing. Strategies to expand the revenue base, resource sharing with the national government and means of attracting external funding are also covered.

5.2 Institutional Framework

This section presents the County's institutional framework and provides the roles of major players in the implementation of CIDP.

Figure 6: Institutional Framework for CIDP Implementation

5.2.1 National Government

The National Government will be responsible for giving policy guidelines on the devolved functions and financing the programmes in the CIDP through disbursements of equitable share, conditional grants and equalization fund.

5.2.2 The County Executive

The County Executive under the leadership of The Governor will be responsible for providing overall leadership and policy guidance on the implementation of the CIDP including establishing appropriate governance structures, ensuring effective coordination of all projects and policy initiatives, effective public participation, accountability in decision making, and resource mobilization strategies. The County Executive Committee will produce relevant reports on the implementation of the CIDP with the budget implementation reports being continually shared with the National Government and Controller of Budget. An effective Monitoring and Evaluation framework for the CIDP will be put in place as discussed in Chapter 6.

5.2.3 County Assembly

The County Assembly is the legislative authority independent from the County Executive and has three distinct roles namely; representation, legislation and oversight. The County Assembly will approve the CIDP and enact relevant laws to support effective implementation of the plan. The legislative oversight of public financial management at the County level is an important function of County Assembly in enhancing accountability and transparency in the use and management of public resources.

5.2.4 Consultative Forums

The consultative forums during the CIDP implementation will include County Budget and Economic Forum (CBEF). CBEF is established under section 137 (1) of the Public Finance Management Act, 2012 to provide a means for consultation by the County Government on preparation of county plans, the county fiscal strategy paper (CFSP), and the Budget Review and Outlook Paper (BROP). CBEF is also responsible for consultations on matters relating to budgeting, the economy and financial management at the county level.

5.2.5 The County Public Service Board

The County Public Service Board is established by the County Governments Act as a corporate body whose core mandates include; establishment and abolishment of offices in the county public service; appointing persons to hold or act in offices of the county public service; confirm appointments; exercise disciplinary control over the public service; promote the values and principles of public service as envisioned in the Constitution of Kenya; facilitate the development of coherent, integrated human resource planning and budgeting and give advise on human resource management and development. The board also prepares regular reports for submission to the County Assembly and makes recommendations to the Salaries and Remunerations Commission, on behalf of the County Government, on the remuneration, pensions and gratuities for County public service employees. Kitui County Public Service Board is in charge of appointing persons in offices of the County public service.

5.2.6 Devolved County Level Units

The devolved county level unit includes all departments involved in the implementation of the CIDP from county to village level, responsible for policy implementation, service provision and enforcement of rules and regulations, including prioritizing in their operational areas. All CIDP implementing departments will develop strategic plans aligned to the CIDP, prepare budgets and develop work plans based on the approved budgets. The CIDP will form the basis for budgeting for the County that will be tabled before the County Assembly for deliberation and approval. This will be followed by the production of annual reports by implementing agencies. Annual reports will detail specific activities towards the implementation of the CIDP.

5.2.7 Development Partners

The responsibility of development partners will include technical assistance and financing to support the implementation of programmes in the CIDP.

5.2.8 Non -State Actors

Non state actors and other stakeholders will be consulted during planning, budgeting and implementation of the CIDP to enhance accountability, sustainability, resource mobilization, ownership, and monitoring and evaluation.

5.3 Stakeholders in the County

There are various stakeholders in the County that are involved in various sectors whose role will be very critical in the implementation of the activities outlined in the CIDP. The Table 50 below provides key stakeholders and roles.

Table 50: Role of Stakeholders in CIDP Implementation

5.4 Resource Requirements by Sector

The table below summarizes the resource requirements by sector. The sector with the largest resource requirements is Lands, Infrastructure, Housing and Urban Development with 30.80 percent followed by agriculture, water and livestock at 27.54 percent of the total resources required. The key projects aim to enhance food security, improved access to water and wealth creation. About 6.78 percent of the resources are required to implement the UHC program and associated health sector expenditures.

5.5 The Resource Mobilization Framework

This section discusses the resource mobilization strategies including revenue raising, asset management, financial management, debt management, capital financing, and accountability. Strategies for revenue mobilization along with budget projections required to manage the County government are also discussed. The section further discusses key revenue streams including own-source, the equitable share of national revenue, expected conditional grants from National Government and Development Partners as well as the Public-Private Partnerships (PPPs) arrangement.

5.5.1 Strategies for Raising Revenue

The various options available to the county include the following:

- Generate revenue from service provision, partnership with non- state actors, development grants and loans, expanding the base through trade and tourism, encouraging private investments, and establishing light industries;
- Host business forums and investor conferences to attract investment and financing into the County;
- Explore new and innovative financing mechanisms to attract private sector investment through mutually agreed arrangements;
- Pursue PPPs aimed at delivering some of the key projects;

- Mobilize resources through borrowing particularly in the medium term once the relevant institutional framework is in place;
- Grants from development partners. Control and management of grants, including procedures to ensure that grants are spent on the basis of the Integrated County Development Plan is specified under the PFM Act 2012.
- Provide information including website postings on viable programs and projects to attract potential investors;
- Preparation of funding proposals to potential financiers and donors for consideration to be done either directly by the communities or by the County Government; and
- Enhance the traditional sources of County revenues.

Other important consideration on internally generated revenues will include:

- Instituting strict supervision of revenue collection;
- Installation of E-revenue which will increase revenue collection and be cost effective;
- Review of rates and fees charged in the County for various services;
- Use of monthly bus park stickers instead of daily receipts
- Improved service delivery and enhanced efficiency in public finance management to create fiscal space;
- Use of standardized weighing machines at barriers for ascertaining the tonnage of sand, charcoal and stock
- Installation of CCTV Cameras in all barriers for close supervision to avoid revenue leakage.
- Use of the Built, Operate, Transfer Model (BOT) to put up social and commercial infrastructure.
- Survey and put barriers in areas which need barriers.

5.5.2 Assets, Financial Management and Accountability

According to Article 226 of the Constitution, The National Treasury is expected to design and prescribe an efficient financial management system for the national and county governments to ensure transparent financial management and standard financial reporting.

The County Treasury, subject to the Constitution, will monitor, evaluate and oversee the management of public finances and economic affairs of the County government including developing and implementing financial and economic policies in the County; preparing the annual budget for the County and coordinating the preparation of estimates of revenue and expenditure of the County government; coordinating the implementation of the budget of the County government; mobilizing resources for funding the budgetary requirements of the County government and putting in place mechanisms to raise revenue and resources.

- The County Treasury will ensure compliance with accounting standards prescribed and published by the Accounting Standards Board from time to time. It will also ensure proper management and control of, and accounting for the finances of the County

government and its entities in order to promote efficient and effective use of the County's budgetary resources;

- In conformity with the constitutional requirements, the County will undertake to develop functional County planning units and improve on plan reporting and implementation, develop fund raising policy, adopt modern asset management models including tracking, utilization and maintenance and develop human resource capacity to maximize efficiency and lastly maximization of resources potential through adoption of technology; and
- The County will put in place the following strategies for managing the assets and finances of the County: improve revenue management system (using online based systems), eliminate leakages, increase revenue base and efficiency, improve budget design and implement expenditure control systems linked to budget and desired outcomes, and adopt technology-based accounting and reporting systems.

5.5.3 Asset Management Strategies

An asset management plan coordinated with all departments with each department being accountable for assets it controls will be put in place. This strategy will define implementation and documentation of asset management practices, plans, processes and procedures within the County. Issues for consideration will include:

- Ensuring that all assets are registered by itemizing their original cost, annual depreciation, maintenance costs and expected disposal costs;
- Develop a capital development plan that defines assets built with County capital and supporting infrastructure;
- Develop a budget for each department's asset management plan reflecting realistic cost of acquisition of necessary assets and disposal of old assets; and
- Developing a Strategic Asset Management Framework (SAMF). This is useful for two purposes (i) It provides policies and guidelines to improve asset investment planning and management across the County and (ii) It helps facilitate quality advice and decision making within the County institutions including the development and review of investment proposals.

5.5.4 Financial Management Strategy

The financial management strategy's main objective is to ensure a high standard in the management of public finances. Development of alternative scenarios reflecting uncertainty will be critical in context setting during the final resource allocation decisions on an annual basis. The focus will be to:

- Set up a prudent minimum level of reserves based on a strategic level risk assessment and reassessed annually as part of the budget process;
- Operating within firm cash limits, allocating provision for inflation at start of the financial year;

- Contain spending within the approved cash limit for the year ensuring that there is no supplementary allocations made from reserves unless under exceptional circumstances; and
- Considerations in services delivery: quality, impact, and competitive pricing.

5.5.5 Capital Financing Strategy

Key issues to be considered under Capital Financing Strategy include:

- Better risk management to meet the demanding calls for private developers and lenders with appropriate risk sharing between the County government and the private sector;
- Need to review the capital strategy on an annual basis and prepare a five-year programme in light of the needs identified in this County Integrated Development Plan, (i.e. including vehicles replacement programme and built estate condition survey and prepare three-year capital programme in accordance with the strategy);
- Reinvestment of income from disposal of capital assets where possible in order to fund new developments and initiatives in the County Integrated Development Plan (CIDP)
- Development of formal procedures for assessment of PPPs in which the focus is ‘value for money’ rather than reductions in debt. Value for money will be achieved by an appropriate allocation of risk;
- The County will also explore the new model called Public-Private Community Partnership (PPCP). This will mean that both the County government and private players work together for social welfare.

5.5.6 Management and Expenditure Control

In terms of management and expenditure control, the County will maintain rigorous annual budgeting and budget monitoring processes and integrated accounting, budgetary and human resources systems. The County will ensure good practices and probity through:

- Implementation of sound financial regulations and associated financial procedures; good practice in financial administration and corporate governance;
- Provision of an effective and efficient internal audit function which works co-operatively with the Auditor General’s office;
- Reporting the internal audit strategy to the governance committee;
- Presentation of the annual Auditor General’s assessment of the County financial status to the governance committee;
- Development and operationalization of computing systems with enhanced provision of financial information to users; and
- Comply with accounting and audit standards contained in relevant codes of practice

5.5.7 Strategies to Enhance Cost Effectiveness

When discussing cost effectiveness, performance of staff is a priority issue on cost effectiveness in the delivery of services, thus the importance of improving productivity of staff. The strategies include:

5.5.7 Training

The County to conduct a needs assessment of capacity gaps and provide relevant trainings for effectiveness and efficiency.

5.5.8 Monitoring Performance

Staff appraisals to monitor performance to be introduced by the County and that monitoring of staff be conducted regularly in the context of performance management tool and process. Retention and attraction of right staff is important. This will depend on the terms of employment and remuneration. There will be need for the County government to adopt Service Charter ensuring that all staff are familiar with the aspirations of the County government and to emphasize their role in enhancement of service delivery. The County will need to undertake relevant reforms to ensure that the ratio of personnel emoluments to total revenue remains within the PFM threshold of 35 percent.

5.6 Revenue Projections, estimated resource gap and measures to address

The section captures the projected revenue, resource gap and the strategies and measures on how to address and finance the gap. It is estimated that the overall successful implementation of this County CIDP 2018 -2022 will cost Ksh. **231.22 Billion** as the total estimated cost of implementing all activities of the CIDP as indicated in figure 5 below. 69.2

Figure 7: Resource Requirements by Sector

The projected funds from the equitable share, local collection and conditional allocations are estimated to be **Ksh. 69.2 billion** for the period 2018/2019-2022/23. This implies that there is a financing gap of **Ksh. 160.99 billion**.

5.6.1 Measures to address the Resource Gap

- **Establishment of a framework for public private partnership framework**

The private sector is a major source of funding to some of the County's programmes. Through the public private partnership, the County will undertake the following activities to source for increased funding:

- Innovation and introduction of public private partnership in business development;
 - Increased awareness forums encouraging for public private partnerships; and
 - Build strong partnership with diaspora ensuring joint programs in planning, financing and implementing County's initiatives.
- **Kitui County Natural Resources.** The County is well endowed with natural resources. There is a need to take stock of all the resources in the County through resource mapping and analysis exercise.
 - **Development Partners:** increase partnership, networking and trust with development partners. There will be need to conduct a mapping of development partners to have a better understanding of their vision and interest

- **Bankable Proposal Writing:** Enhance the capacity of staff to be able to write bankable proposals.
- **Vibrant County Civil Society Organizations with strong capacity:** The capacity of civil society and NGOs will be important in strengthening their networks so that they can attract joint programmes with various stakeholders within and outside the County.
- **Strengthen institutional structures of Co-operatives and Societies:** Ensure that co-operative societies function well and attract funding.
- **County to adopt efficient and accessible processing of transactions**
 - Payment of bills will be in line with the Country government prompt payment targets while ensuring best practices in relationships with contractors and suppliers;
 - Computing systems will be improved and extended to support delivering financial support services to users;
 - The County to ensure that financial systems are set up in the context of utilization of e-government;
 - To develop and implement prudent financial systems and controls;
 - Automation of County operations; and
 - Connect revenue module to IFMIS

5.7 Fiscal Discipline

Chapter 12 of the constitution focuses on financial prudence, accountability and responsibility are fundamental public finance principles. Fiscal responsibility principles to be enforced by County treasuries are spelt out in part four of the Public Finance Management Act, 2012 (PFMA, 2012). The focus is on County Government responsibilities in terms of managing and controlling public finance. As such, the County is expected to apply cost-cutting and waste reduction strategies aimed at increasing resources for development. Focusing on procurement, strengthening the procurement and audit systems is important whilst ensuring that capacity issues of staff are addressed in a sustainable manner.

- **Enhanced Use of ICT:** The aim is to automate revenue management and enhance effective revenue collection.
- **Resource Mobilization Unit**

The County will set up a resource mobilization unit under Treasury. This unit will be tasked with spearheading and developing resource mobilization strategies, set priorities, identify potential donors, participate in resource mobilization forums and ensure adoption of a workable monitoring and evaluation of resources including grants, commitments and pledges.

CHAPTER SIX: MONITORING AND EVALUATION FRAMEWORK

6.1 Introduction

This chapter presents the monitoring and evaluation framework that will be used to track progress on implementation of the CIDP. It also explores the data collection, analysis and reporting mechanism as well as the institutional framework for Monitoring and Evaluation. An indicative matrix showing the outcome indicators, baseline, mid-term and end-term targets is also presented.

6.2 Data collection, Analysis, and Reporting

Data collection, analysis and reporting together with the institutional framework form the foundations for an effective monitoring and evaluation system. The baseline data or indicators provide the benchmark against which progress is evaluated. In preparing this CIDP, it was not possible to obtain baseline data on some key indicators. Where possible, the County will undertake surveys to obtain the baseline data. The evaluation of the implementation of this CIDP is planned at two-stages, namely, mid-term and end-term. However, the County will produce annual reports on the implementation of the CIDP. The reports will be used to evaluate progress in achieving goals and also in reviewing and improving management of projects and programmes.

6.3 Institutional Framework for Monitoring and Evaluation

The County will establish a M&E Unit at the County Treasury and a formal structure of M&E process as provided for in the County Integrated Monitoring and Evaluation System (CIMES) Guidelines, 2016 to include the following:

- | | | | |
|------|-------|---|--|
| i. | MEU | - | M&E Unit at the County Treasury; |
| ii. | SCMEC | - | Sub-County Monitoring Evaluation Committee; |
| iii. | CPPMU | - | County Project Planning and Management Unit; |
| iv. | CEC | - | County Executive Committee; and |
| v. | CMESC | - | County Monitoring and Evaluation Steering Committee. |

M&E Plan and Setting of Performance Targets

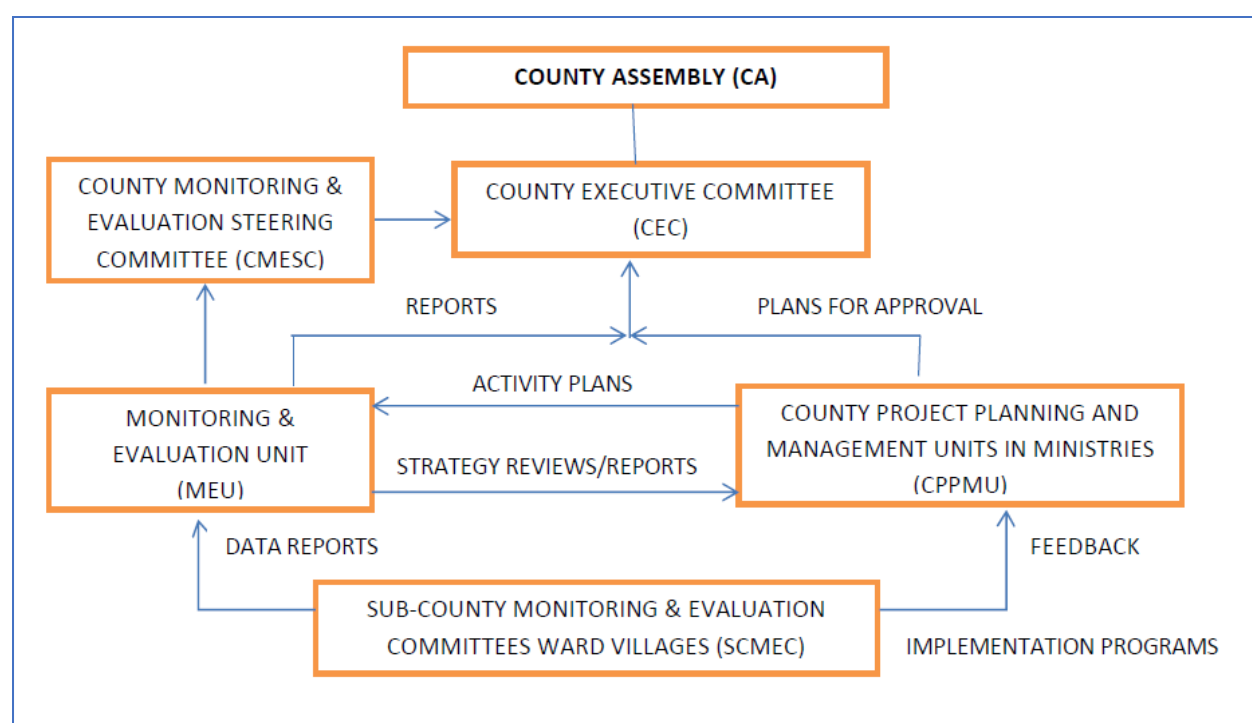

Every sector/department at the beginning of every financial year develops an annual work plan and signs a performance SCORECARD with the supervisor based on agreed project/programme performance indicators and targets as per the CIDP implementation matrix. The individual work plan is derived from the departmental workplans and the officer's job description. Each department workplans should be translated into M&E plans guided by a clear results chain approach – the log frame. Such scorecard shall form the basis on which each officer's performance shall be measured and is used to drive service delivery and execution of programmes and successful achievement of plans. They also form the basis of facts and

evidence-based dialogues. This outcome approach is adopted in developing the County Indicator handbook.

M&E Capacity and resources

M&E require enormous financial and technical resources for effective implementation. County M&E capacity development will continuously be improved at all levels and sectors to ensure effective implementation and reporting of development programmes, policies and projects during the plan period.

Monitoring and Evaluation Institutional Arrangement

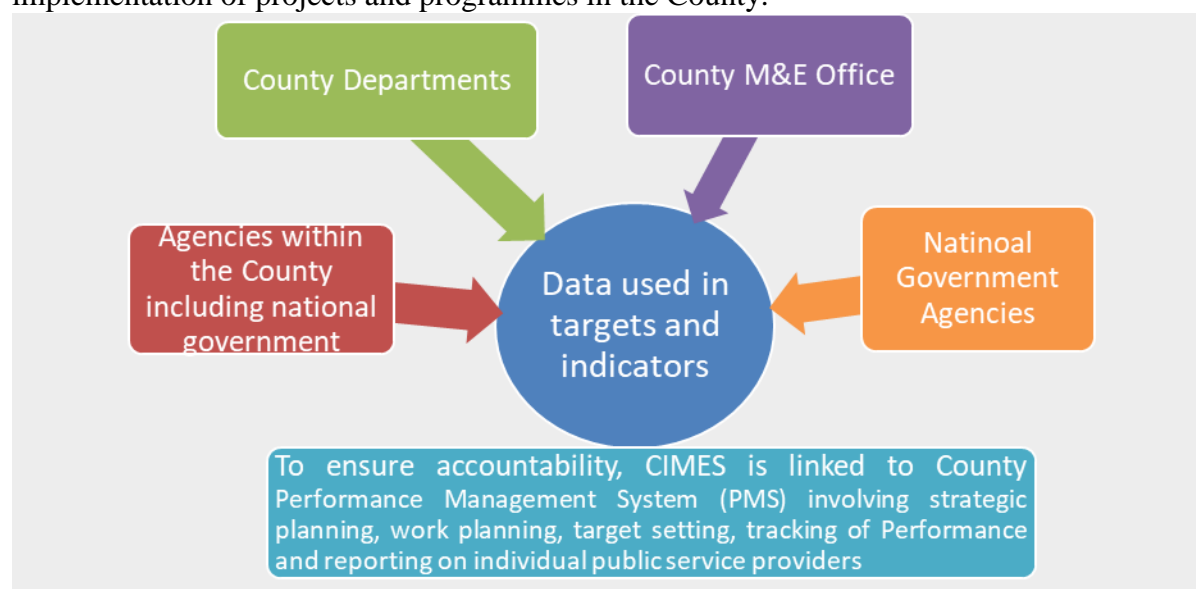

M&E Indicators

To monitor the progress of the County CIDP interventions and activities, it is necessary to define appropriate indicators to feasibly measure results. An outcome approach will be adopted in developing the County Indicator handbook. This performance paradigm shift is informed by the theory of results-based management that focuses on results/outcome rather than activity-process for government.

Performance Management Plan

The County government act, 2012 section 54 requires public entities including County governments to develop performance management plans to guide management and conduct of public affairs. Specifically, the management plan outlines all aspects of County operations and

development within a single integrated strategic process. The performance management framework connects the activities from the M&E results matrix to the performance contracts of individual senior management staff members, and to the operations of service delivery and implementation of projects and programmes in the County.

Results-Based Budgeting

The design of the 2nd generation CIDP is in line with the principle of performance-based budgeting as provided under the Public Finance and Management Act and the wider approach of Managing-for-Results in the public sector. Therefore, implementation of the 5-year CIDP will be through Annual Development Plans (ADP) based on annual programme-Based budgets. Program budgeting is performance-based as it indicates how much resources is being directed at achieving particular outcomes for the citizens. This provide information for decision making based on benefits and efficiency of programs relative to their costs.

The County Monitoring and Evaluation Committee (CMEC) will be put in place to serve the needs of the County government, while complementing the national M&E system. The CMEC consists of members representing County and national government agencies, civil society organizations and the private sector. The activities of the CMEC include preparation of the County Annual M&E Report (CAMER), which will capture feedback to the national level. At the sub-County levels, there will be a sub-County M&E committee to coordinate M&E activities at sub-County, ward and village levels. An M&E unit will be established to act as the secretariat to coordinate the implementation of the County Integrated Monitoring and Evaluation System (CIMEs).

The tables below summarize the baseline data/indicators, and both mid-term and end-term targets that will inform the M&E process.
